

### **Project :- 132 KV GIS Line at PHOOLBAG**

This project is extremely essential for reliable and stable supply to Gwalior city. To lay the 132 KV line to proposed GIS (Gas Insulated Substation) PHOOLBAG in the heart of the Gwalior city; there is no other option then to lay part of the line through Ohadpur RF forest to link it with existing 132 KV line from 220 KV substation Mahalgaon to 220 KV Substation Gwalior- II. There is no other alternative route as the linking existing old line passes through forest.
