HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water. Cultivated areas are coloured yellow. The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribbands.

Contours are approximate. A relative height, dr, represents the approximate height, in metres, between the top and bottom of a steep slope. Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.

The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them. The area appearing in square A/3 of this map is magnetically disturbed and the variation given may differ largely from the actual value. A relative height, e.g., 30, against a well in blue or a mine in black, indicates its local depth in metres. The state boundary between Andhra Pradesh and Orissa has been surveyed as pointed out by the local officials on the ground, but has not been verified by the Government concerned. A relative height, e.g., 2, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.

Printed at the 104 (HDI) Printing House or Bureau of India.
