

## **Note Containing Justification for locating the project in Revenue forest land in Dharmjaygarh**

The proposal to establish 220/132/33 KV Sub-station at Dharmjaygarh is approved By honorable Electricity Regulatory Comitee (C.G.Govt) in respective of providing uninterrupted and better quality electricity to Dharmjaygarh and near by areas which is in Raigarh Distt an A.L.W affected area. This project will also provide Electrical Connectivity to upcoming industries.

In present scenario power supply to Dharmjaygarh and near by areas is through 33/11 KV LT line, the length of the line is too long hence, interruptions and line losses are much more.

This project will help to overcome all the drawbacks of 33/11 KV line and can also provide employment to the local workers during its construction.

Since the proposed land is best located for the incoming and outgoing of the transmission line with a proper road connectivity , No other alternative place is found suitable for this purpose . Hence the project is formulated at the proposed land.
