Justification Note-D1

The mining lease 2545 jaisingpur iron ore mines was granted in the year 2007 and after categorization by the honorable CEC was categorised as B-category after completion all formalities the monitoring committee team during inspection instructed the forest RFO Sandur to check and demark if the existing approach road for ancillary activities to the said mine was moving in the forest area and if FC was required for the same

The RFO recognized 0.32 Ha of area of the existing road moving in the forest boundary for which we have been requesting FC and since it is the existing road commonly used and involves minimum deforestation and is unavoidable to reach the mining lease we have requested for FC for the said area of 0.32 Ha
