NOTES :-

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g., 100, indicates the height in metres between the top and bottom of a steep slope.
A relative height, e.g., 100, against a well, indicates its total depth in metres.
Tanks, shown dry, in this sheet usually contain water from July to December.
Wells and tubewells are numerous throughout the sheet, only the important ones have been shown.
Unmetalled roads, in this sheet are generally metalled in the season.
The area adjoining the Ganges River is liable to change owing to continual siltation in the course of the river.
The milestone numbers along roads, railways and canals are shown in slant type, e.g., 100, whereas milestone numbers are shown in upright type, e.g., 100.
