भारतीय सर्वेक्षण विभाग SURVEY OF INDIA

[illegible]

Heights are in metres and above Indian mean sea level.
 Contours are approximate.
 1. relative height, h_r , represents the approximate height, in metres, between the top and bottom of a slope step.
 The marginal height and contours in this sheet have not been adjusted to the heights of the established benchmarks and may therefore not be directly useful in conjunction with them.
 Generalised records used on charts based on this sheet are not shown in any sequence. Permission to use these maps relating contours is required from the Hydrographic authorities.
 A relative height, h_r , may be shown, as a contour, indicating the height of the top of the canal or the bottom of the approach.
 Tanke, shown h_r in 1964 and used until water from July to December.
 A relative height, h_r , of 100, is equal to 1 m. In blue, indicates a full depth of metres.
 The 10 metre scale numbers along canals are shown in short type, e.g. 10, 20, 30, whereas relative heights are shown in long type, e.g. 100, 200, 300.

A. Compiled from 1,25,000 survey, 1985-89. Updated for major details during 2005-08.

Magnetic Variation from True North about $1\frac{1}{4}^{\circ}$ West in 2005.
