भारतीय सर्वेक्षण विभाग

1st Edition 2009.

REFERENCE
NH 65
National Highway No.

NOTES :-

Contours are approximate. Heights are in metres and above Indian mean sea level. A relative height is marked along a canal, indicates the height of the top of the canal above the adjacent country.
Tide gauges are marked throughout the sheet, only the important ones have been shown. Tides shown dry, in this area usually within water from March to December. A relative height is marked against a well, indicates its depth in metres.
Distances along roads and rail are given in feet and every crossing fifth station is shown.
