

KHORA TANK SCHEME

Justification of site

Khora tank scheme is planned to provide 146 hact, Annual irrigation on CCA is 225 ha. in Rabi season two villages Baghwar Khurd and Ranipura is benefitted in Raipura Tehsil of Panna District. Proposed project have a gross storage capacity 0.905 M.cum. out of 0.88 M.cum. Will be created for flow irrigation.

Presently irrigation facilities in the region are about 20% by local sources proposed minor tank contructed on local nalla.

Following are the salient feature:-

1. Dam has 0.88 M.cum live capacity.
2. Two Nos of villages will be benefitted by flow irrigation.
3. Submergence area of dam is 16.05 hact. Out of which 1.60 hact. Forest land, 8.03 hact. Government land and 6.42 hact. Non irrigated private land are effected which is quite economical.
4. Project will provide 146 hact. Flow irrigation in two villages Baghwar Khurd and Ranipura in benefitted in Raipura Tehsil of Panna district.
5. Project will boost agricultrue productivity of backward region in there are no land available better than this site. It has less number of trees and there are no valuable trees are there.

As there is no other suitable site near by private land for constrution of dam and submergence of the scheme present alternate but to the required forest land.

The forest land proposed for acquisition is the best minimum required.
