

**JUSTIFICATION FOR LOCATING 132KV LINK TRANSMISSION  
LINE (LOOP OUT) FROM 400 KV SUB-STATION AT THOUBAL  
TO YAIRIPOK YAMBEM**

This 132 kV Link transmission line to be constructed from 400 kV Sub-Station at Thoubal (sending point) to Yairipok Yambem (tapping point) has to pass through the forest land located on the hills lying in between these two points. So there is no alternative route to avoid the forest land. The selected route of this line is the most feasible and shortest of all the other possible routes. The land is required for erection of 18 nos. of 132 kV towers and stringing of 3.49 Km. transmission line.
