HEIGHTS & CONTOURS IN METRES

CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they definitely contain water.

Cultivated areas are coloured yellow.

The smaller, hatched or dotted areas of Arroyos or Flooded Ponds are shown by green hatching.

Contours are approximately.

A relative height, if representing the approximate height, in metres, between the two soil features of a ridge.

Unshaded areas are coloured green. Cultivated trees and other vegetation are in green, but

A relative height e.g. 20/100000 is used in blue indicates the total depth in metres.
Tanks shown dry, in this case usually means water been fully in September.
Disturbance is periodic and dependent on rainfall
Compared to this sheet, you can see which there is no descriptive remarks, are generally measurable (flow: what dried in dry season).

MEASURES & CONTROLS IN METRIC

The water boundaries of each of
National or Protected Forests are shown by
green lines.

Contours are approximate.
A relative height, h_r , represents the
approximate height, in metres, between the
top and bottom of a steep slope.
Shaded areas are coloured green. Features

A smaller sample e.g. 250, against a well, for instance, to test depth to water table, shows dry, to that that usually occurs some time July to November. Colours are periodic and dependent on rainfall.
