NOTES -
Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height, e.g., 30, represents the approximate heights, in metres, between the top and bottom of a slope.
A contour height, e.g., 30, marked along a canal, indicates the heights of the top of the canal embankment above the adjacent country.
Tanks shown dry in this sheet usually contain water from July to March.
Wells and tube-wells are numerous throughout the sheet, only the important ones have been shown.
Unimproved roads and cart-tracks in this sheet are generally not shown in dry season. Permission to use those along canals is required from the irrigation authorities.
The unimproved roads and cart-tracks in this sheet have not been adjusted to the heights of the sea-levelled benchmarks and may not be strictly in accordance with them.
Fertile River in flood in confined channel due to shifting of the river bed.
Forest boundaries in this sheet have not been verified by the Divisional Forest Officer concerned.
The state boundaries between Delhi, Haryana and Uttar Pradesh States have been surveyed as pointed out by the local officials on the ground but have not been verified by the Government concerned.
The state boundary between Uttar Pradesh and Haryana States were not officially found during verification survey 2005-06.
