NOTES :

Heights are in metres and above Indian mean sea level.
Contours are approximate.
A relative height e.g., 8 represents the approximate height, in metres, between the top and bottom of a steep slope.
Unmetalled roads and cart-tracks in this sheet are generally motorable in dry season. Permission to use these along canals is required from the irrigations authorities.
The fifteenths stone numbers along railways, roads, cart-tracks and canals are shown in slant type, e.g., 9 whereas milestone numbers are shown in upright type, e.g., 9.
Tanks, shown dry, to be only recently cleaned water from July to December.
Tube-wells and Wells in use are generally numerous, but for clearness, only the prominent ones have been shown.
Forest boundaries are not demarcated but have been surveyed as perfect as by the forest officials.
The triangulated heights and contours in this sheet are based on the aerial photographs taken by the Survey of India in the years 1966-67 and 1967-68.
Numerous field bunds up to 2 metres in height occur throughout the sheet, only the important ones have been shown.
