

CHECK LIST NO-09 PAGE NO-22**Justification For locating the Project**

At present there about 31,764 population of this district. This fire post established at keylong on 10-06-2012 and thereafter no additional construction of rooms, office and garage were made, because there is no space for parking vehicles and room for officials.

Secondly the number of officials and fire equipment are increasing every year. This land where the new fire post building/garage is to be constructed not even a single tree need to be cut, therefore land transfer may be done as soon as possible. So new building could be constructed well in time. At the same time it would be easy for the administration to run the fire post smoothly and efficiently.

The present proposed site for the fire post building is good for the dormitory, office, garage and also touch form the national highway-21.

There is no other non forest land/Pvt. Land is available for the construction of fire Post.
