NOTES :-
Heights are in metres and above Indian mean sea level.
Contours are spot heights.
The triangulation heights and contours in this sheet have not been adjusted to the heights of the world-wide bench-marks and may not be strictly in accordance with them.
The orthometric heights in this sheet have been corrected to mean sea level by the local officials on the ground but have not been verified by the authorities concerned.
A double height, i.e. represents the approximate height, in metres, between the top and bottom of a steep slope.
Forest boundaries have not been shown due to want of reliable information.
