NOTES

Heights and contours have not been shown.
A relative height, B, represents the approximate height, in metres, between the top and bottom of a steep slope.
A relative height, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
Tanks, shown dry, in this area, usually contain water from July to March.
Tube-wells are numerous throughout the sheet, only the important ones have been shown.
Unmetalled roads and cart tracks in this sheet are generally motorable in dry season. Permission to use those along canals is required from irrigation authorities.
The kilometre stone numbers along roads, railways and canals are shown in slant type e.g. 'S' whereas milestone numbers are shown in upright type, e.g. '5'.
Common boundaries between forests have not been shown for want of reliable information.
