

### **JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST AREA**

- The approach road connects the 3 Quarries and the main road, it is the shortest route among all the alternatives
- Minimum forest area is to be affected by construction of this approach road among all the possible alternatives.
- Only single approach road can connect the 3 Quarries making the time of travelling very less.
- There is no nearby non-forest land for the construction of approach road hence we choose the forest land for its implementation.
