

**OFFICE OF THE ASSISTANT ENGINEER  
RURAL DEVELOPMENT DEPARTMENT  
GOVERNMENT OF SIKKIM  
JORETHANG**

Justification for construction of PMGSY road from Sikip to Ambotey Chisopani under poklok Denchung GPU and 36- Tinik Chisopani GPU in south sikkim. The sanctioned scheme requires Forest clearance as it passes through Government slip, government jhora, khasmal, reserved forest. This project falls in the south District of sikkim. This road will connect sikip, Kamrang, Dong, Ambotey, Samatar, Thulung gaon and Karfector (which is approximately 28.00 km from Namchi) in the south direction. The proposed road is 14.04 km in length. Presently there are no means of vehicular transportation facilities to this village to connect with the district HQ at namchi and other important towns. The majority of the population are farmers and depends on agriculture. The road on completion will act as a lifeline of the people of that area for the transportation of their agricultural products to the town and help to transport their basic household amenities. This road will also help them to reach the district offices, healthcare centers etc. and have easier access to all facilities, which are not available in the village.

Yours Faithfully

Assistant Engineer  
Rural Development Department  
Government of Sikkim  
Jorethang, South Sikkim
