HEIGHTS & CONTOURS IN METRES
CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water.
Cultivated areas are coloured yellow.
The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribbons.
Contours are approximate.
A relative height, Δ , represents the approximate height, in metres, between the top and bottom of a steep slope.
Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks, and may not be entirely in accordance with them.
Car-cracks, in this sheet, against which there is no descriptive remark, are generally motorable in dry season.
The kilometre stones numbered along the road, railway, canal, fire lines and car-cracks are shown in slant type, e.g., '1' whereas milestone numbers are shown in upright type, e.g., '5'.
A relative height, e.g., Δ , marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.
The unmetalled road along the Chitral Right Main Canal is motorable. Permission to use this is required from the Irrigation authorities.
Tanks, shown dry, in this area usually contain water from July to October.
Perennial streams in this sheet are generally fordable from November to June.
A relative height, e.g., Δ , against a well indicates its total depth in metres.
The state boundary in the Chambal River follows the main deep water channel and will change with the fluctuations of that channel, this boundary, has been surveyed on the ground as pointed out by the local officials but has not been verified by the Government of Madhya Pradesh.
