

DETAILS OF THE LINKED END-USE PROJECT

Government of India allotted Utkal-E coal block to M/s NALCO to meet the future requirement. Considering the requirement of coal for 2nd phase of CPP expansion, NALCO wanted to develop a coal mine in this block. The mining plan is developed to seek clearances for mining of coal from Utkal –E block based on final GR prepared by CMPDI. Aluminium smelter plant is located at Angul. The captive power plant with an install capacity of 960MW is also located at Angul.

The additional demand for 2 units of 120 MW is projected as about 2MTy to meet this entire requirement. Utkal-E block has enough reserve to produce the coal at this capacity.
