

Justification of the Project

AMBA RODIYA MICRO LIFT IRRIGATION PROJECT

Narmada Development Canal Division 21 Sanavad, district Khargone proposed Amba Rodiya Micro Lift Irrigation Project. This project is planned to irrigate 9915 ha Cultivable Command area (CCA) spread in 40 villages of Kasrawad, Bhikhangaon and Sanavad Tehsil of Khargone District with Water sourced from ISP main canal. Introduction of irrigation will definitely increase agriculture production and change in crop diversification for better income of farmers. This project will generate direct and indirect employment in local economy, transport, market and processing. Availability of water will have some changes in Composition of tree under planned programme in form of fodder, fruits and fuel woods.

Most important things of this project is that maximum beneficiary of this projects are poor and poor trebles

There are no alternate without the forest area project alignment can done
