

NOTE CONTAINING DETAILS OF THE LINKED END USE PROJECT

The applicant company, M/s Shri Bajrang Power & Ispat Ltd signed MoU with the Chhatisgarh State Government for setting up of mega projects within the State. As per MoU , the applicant company has set up 2 x 350 TPD sponge Iron plant with 18 MW captive power plant in village **Borjhara under Urla Industrial Area of Raipur District**, CG. The entire unit is indigenous and has been commissioned with a shortest gestation period of 11 months.

In addition to the above, under the expansion scheme, the applicant company is increasing his capacity of production of Sponge Iron / DRI from 2.1 lacs tons to 6.81 lacs tons per annum and generation of power from 26 MW to 125 MW and also commissioning of 14 lacs tons per annum capacity palletisation plant at **Tandwa Village near Tilda in Raipur District**, CG.

During the MoU, as per the understanding with State Government, the applicant company has applied for Mining Leases of Iron ore in the State to meet the partial fulfilment of its raw material requirement for the above plants. The present diversion proposal is a step in this regard for partial fulfilment of raw material requirement in the above plants.
