

JUSTIFICATION FOR LOCATING THE PROJECT IN FOREST AREA

The road from Barigam Konaiyankadu to Malaiyurkadu Road Km 0/0-3/0(3000m) is proposed at an approximate estimated cost of Rs.97.22 Lakhs to give connectivity to the Thoppur Railway Station. The Malaiyurkadu village having a population of more than 5000 and the people of the village has to come to Taluk office to Dharmapuri and Higher secondary school to Vellar and for Medical purpose to Thoppur Government Hospital. Hence, providing the road is felt essential.

Further, due to inaccessibility by road connectivity, the forest protection is a major problem. Therefore, for better protection and conservation, laying of this road is absolutely necessary. If forest protection road is connected with Malaiyurkadu road, inspection into the Reserved Forest will be very easy and Forest inspection to the interior forest area will also be possible.
