NOTES:-

Heights are in metres and above Indian mean sea level. Contours are approximate. A relative height, e.g., 50', represents the approximate height, in metres, between the top and bottom of a steep slope. The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them. Unmetalled roads are motorable and most of the cart-tracks jeepsable in dry season. The kilometre stone numbers along roads are shown in slant type e.g., 35. Forest boundaries with the remark 'Alignment unverified' or 'AU' typed alongside were found unverified and have been entered from 4-inch scale Forest maps corrected by the Forest authorities up to 1978 but have not been departmentally verified. Barefoot trees are shown thus.
