REFERENCE
B Baswa

NOTES:-

Heights are in meters and above Indian mean sea level.
Contours are approximate.
A relative height, e.g., 200, against a well, indicates its total depth in meters.
Towns, shown etc., in this area usually receive water from July to October.
Canals and canalised rivers, in this area, are generally not navigable in dry seasons.
Limits of cultivation are variable and dependent on water.
Wells are numerous throughout the sheet; only the important ones have been shown.
Dapp is a tank which is used for collection of water.
