CONVENTIONAL SYMBOLS

NOTES

Heights are in metres and above Indian mean sea level.  
Contours are approximate.  
A relative height, e.g., 50, represents the approximate height, in metres, between the top and bottom of a steep slope.  
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit levelled bench marks and may not be strictly in accordance with them.  
Tide marks are numerous throughout the indicated areas, only the more important ones have been shown.  
A relative height, e.g., 50, marked along a stream, indicates the height of the top of the stream embankment above the datum country.  
Tanks, shown dry, in this area usually contain water from July to December.
