

Name of Project : Rural Electrification Works Under PMDP Scheme in Ramban.

Laying of 11 KV lines under PMDP Scheme for supply of Power from 3.15MVA, 33/11kV kanga station.

Justification for laying of 11KV Lines in Forest Area.

The final alignment of 11KV Line has been done in such a way that the minimum forest area is required for construction of 11 KV Lines in this area. The forest area involved in this project is bare minimum which is unavoidable .

Power Sector has played a very vital role in Socio - Economic Development . The construction of 11KV feeders shall improve the quality of living in remote/rural areas of Ramban District. , Ministry of Power, Govt of India & J&K govt. is taking keen interest for electrification in remote/rural areas. 11KV lines are environment friendly and do not involve any disposal of solid effluents & Hazardous substances on land , air or water. The implementation of project shall augment the grid capacity of the district by additional 3.15MVA which in itself will mitigate the supply-load mismatch and hence will improve the power profile of the district and provide access to electricity to rural households in Ramban District.
