|  | Proposed Forest land to be |
|  | Non Forest land            |

REFERENCE

NR 29 National Highway No. 29

#### NOTES

Height is in metres and above Indian mean sea level.  
Contours are approximate.  
A relative height, e.g., 50' represents the approximate height, in metres, between the top and bottom of a steep slope.  
The kilometre stone numbers along roads, railways and canals are shown in short type, e.g., '5' whereas the kilometre numbers shown in upright type, e.g., '50'.  
A relative height, e.g., 50' marked along a canal, indicates the height of the top of the canal embankment above the adjacent ground.  
The areas adjoining the Ganges and Gomti rivers are liable to crops owing to continual fluctuations in the courses of these rivers.  
Wells are numerous throughout the sheet, only the important ones have been shown.  
Tanks, shown dry, in this area, usually contain water from July to December.  
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.  
All cart tracks and unmetalled roads in this sheet are generally not suitable in dry season. Permission to use these along roads is required from the revenue authorities.  
COMPILED INDEX

A. Modern Survey 1972-73. Updated for major details and administrative boundaries updated during 2020-21.

Projection - UTM Datum - WGS 84

Magnetic Variation from True North about 4° West in 2005.

(Decreasing by about 1' annually).

Scale 1:50,000

500 m to 1 km

2 cm to 1 km

CONTOUR INTERVAL 20 METRES
