HEIGHTS & CONTOURS IN METRES  
CONTOUR INTERVAL 20 METRES

Water features are shown in blue where they generally contain water.

Cultivated areas are coloured yellow.

The exterior boundaries of areas of Reserved or Protected Forests are shown by green ribands.

The kilometre stone numbers along roads are shown in slant type e.g. '5' whereas milestone numbers are shown in upright type e.g. '5'. The triangulated heights and contours have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them. Most of the unmetalled roads are motorable in dry season.

Contours are approximate.  
A relative height, e.g., represents the approximate height, in metres, between the top and bottom of a steep slope.  
Wooded areas are coloured green. Scattered trees and other vegetation are in green, but prominent surveyed trees are in black.
