NOTES :-

heights and contours have not been shown.

A relative height, *h_r*, represents the approximate height, in meters, between the top and bottom of a steep slope.

A relative height, *h_c*, marked along a canal, indicates the height of the top of the canal embankment above the adjacent country.

Tanks, shown dry, in this sheet, usually contain water from July to December.

Small, mostly temporary streams throughout the sheet only the important ones have been shown.

The area adjoining the Tana or Cheita River is liable to change owing to constant fluctuation in the course of the river.
