Proposed Forest Land Site for CA Plantation

REFERENCES

NOTES :-  
Heights are in metres and above Indian mean sea level.  
Contours are approximate.  
A relative height, e.g., 20, represents the approximate height, in metres, between the top and bottom of a steep slope.  
The triangulated heights and contours in this sheet have not been adjusted to the heights of the spirit-levelled bench-marks and may not be strictly in accordance with them.  
All canals and unmetalled roads in this sheet are generally mettable in dry season. Permission to use these along canals is required from the Irrigation authorities.  
A relative height e.g., 3, marked along canal, indicates the height of the top of the canal embankment above the adjacent country.  
Wells and tube-wells are numerous throughout this sheet; only the important ones have been shown.  
Tanks shown dry in this area, usually contain water from July to March.

COMPILATION INDEX  
A Modern Survey 1989-90. Updated for major details during 2006-07.

Projection - UTM Datum - WGS 84  
Magnetic Variation from True North about 0° in 2005.  
(Increasing by about 1° annually).  
Scale 1:50,000  
500 m to 1 cm  
2 cm to 1 km  
CONTOUR INTERVAL 10 METRES
