Full title of the Project: Up-gradation of Reasi-Arnas-Mahore road to NHDL specifications from KM 57.00 to KM 68.00 in 31 BRTF area under Project Sampark in J&K UT

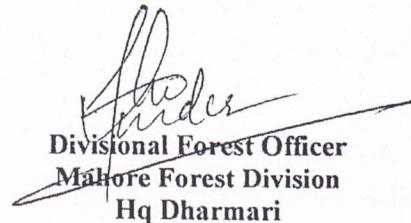

File No: FP/JK/ROPAD/43956/2020

Date of Proposal: 16/01/2020

Subject: - Revised Recommendations

The project is recommended because the area to be diverted is small area of 3.22 ha and the trees required to be felled are 21 only (Chir pine trees only). The project will not have any major impact on flora and fauna of the area. Mitigation measures in the form of Compensatory Afforestation plan over 3.22 ha forest area has been proposed to mitigate the environmental loss due to the project. The additional land along the curves and muck dumping sites are required for the completion of this project. The BRO project is of national importance and is a strategically very important project. It is therefore recommended that the project may be cleared under the Forest (Conservation) Act, 1980.
