No.RW/NH-11052/6/95-DO.I

Dated the 5th February, 1996

To

Chief Engineers, Public Works Departments of all States Govts./Union Territories (dealing with National Highways)

Subject: Implementation of stipulated environmental safeguards and conditions for major Highway Projects

As you are aware all major highway projects costing more than Rs.5 crore require clearance by the Ministry of Environment & Forests (MOE&F). Such a clearance is given subject to the implementation of stipulated safeguards and conditions. The project authorities are required to report every six months on the progress of implementation of these conditions/safeguards stipulated to the concerned Regional Officer of MOE&F to monitor the same for effective implementation.

2. It has been brought to the notice of this Ministry that the conditions/safeguards stipulated are not being properly implemented by the project authorities and requisite information/progress reports are also not being sent to the Regional Offices of the MOE&F. This has resulted in issuing notices for stopping the work on the projects in certain cases by the MOE&F. It is, therefore, desirable that the State Chief Engineers/Project Directors who are handling major National Highways projects including those externally aided ones, should ensure that conditions/safeguards stipulated by MOE&F are properly implemented at site and necessary information/progress reports are sent to the concerned Regional Offices of MOE&F as well as Regional Officer of the Ministry. Any difficulties encountered in this regard should be sorted out by discussing the problems at appropriate levels.

3. Necessary instructions in this regard may please be issued to the field officers in your Department under intimation to this Ministry.

No.RW/NH-11052/1/97-DO.I

Dated, the 24th April, 1997

To

The Secretaries, PWD of all States/UTs, (dealing with National Highways), Director General Border Roads, Director General (Works), Central Public Works Department, Chairman, National Highways Authority of India

Subject: Exemption from environmental clearance for Road projects along the existing alignment - Reg.

I am directed to send herewith a copy of letter No. J-21012/15/96-IA-III dated 12th March 1997 from the Ministry of Environment & Forests, New Delhi on the subject mentioned above for information and necessary action.

Enclosure to letter No.RW/NH-11052/1/97-DO.I, dated the 24th April. 1997

Copy of letter No. J-21012/15/96-IA-III dated 12th March, 1997 from the Ministry of Environments & Forests, New Delhi addressed to the Secretary, Ministry of Surface Transport, New Delhi regarding exemption from Environmental clearance for Roads Projects along the existing alignment.

Reference is invited to D.O. letter of even number dated 29th November, 1996 from Shri R.H. Khwaja, Joint Secretary in this Ministry on the subject mentioned above. As mentioned in the afore-mentioned letter, a Group was constituted to consider the issues relating to exemption from environmental clearance for road projects along the existing alignments. The recommendations made by the Group are as under :

1. The projects relating to improvement works including widening and strengthening with marginal land acquisition of roads along the existing alignments irrespective of the cost component may be exempted from obtaining environmental clearance from this Ministry. The Committee also took note of the decision taken by the cabinet during its meeting

on 15.1.97 that the road projects on existing alignments which are in the nature of improvement by way of widening the existing roads are to be exempted from clearance from environmental and forestry angles. The amendments in this regard are being made in the EIA Notification.

2. In relating to the acquisition of marginal land for improvement of roads along the existing alignment, the proposal would need to be examined by the concerned Ministry on case to case basis and approved at their end keeping in view the following :
 - a) Where the Department has already got the land under its ownership, and no additional acquisition of land is involved, no problems are envisaged.
 - b) Where extra borrow land is to be acquired by the side of existing right of way, no problems are envisaged.
 - c) Where acquisition of additional land involves cutting of trees on non-forest land, adequate compensatory plantation would be necessary.
 - d) Where acquisition of additional land involves displacement of population, rehabilitation for the displaced persons would be necessary.
3. For diversion of forest land, if any, required for road improvement projects, necessary clearance under the Forest (Conservation) Act, 1980 would be required under the existing procedure.
4. If the existing road passes through ecologically sensitive areas such as sanctuaries, tiger reserve, reserved forests etc. it shall be necessary to obtain environmental clearance even if the proposal is for strengthening and widening of road along the existing alignments.
5. Even in those cases where environmental clearance from this Ministry is not being obtained for road projects, the project proponents would need to carry out a detailed EIA study and provide necessary mitigative measures to ensure that the adverse environmental impacts are minimised. Ministry of Environment & Forests shall be kept apprised of any such developmental projects being implemented.

As the implementation of the above recommendations would require amendment in the EIA Notification, 1994, further necessary action in the matter is being taken and we will keep you informed of the developments in this regard.

Opinion of the Chief Wildlife Warden, Maharashtra State

["Proposal for up-gradation of existing NH-353 C to two/four lane with paved shoulders configuration in wildlife passing of Tiger Conservation Plan of TATR from Zamela Nalha to Sironcha in Gadchiroli District of Maharashtra. (TCP of TATR)"]

i) Brief history of the Protected Area :-

Tiger conservation efforts in forest landscapes like the Eastern Vidarbha region are vital for preserving biodiversity and ecological balance. The conservator of forests plays a pivotal role in managing and safeguarding tiger habitats, coordinating conservation initiatives, enforcing wildlife protection laws, and promoting community involvement in conservation efforts.

The Eastern Vidarbha landscape, known for its rich biodiversity and critical tiger habitats, requires focused conservation strategies to address threats such as habitat loss, poaching, and human-wildlife conflicts. Conservation efforts here often involve habitat restoration, anti-poaching measures, wildlife monitoring, and community engagement programs to ensure the long-term survival of tigers and their ecosystems.

Collaborative efforts between government agencies, conservation organizations, local communities, and stakeholders are essential for effective tiger conservation in the Eastern Vidarbha landscape, ensuring the preservation of these majestic animals and their habitats for future generations.

These connecting links are important for tiger conservation and therefore it attracts the provision of Section 38-(1)(g) of Wildlife (Protection) Act 1972.

Any linear infrastructure therefore need to be planned in such a way that will not break the habitat. Government of India, has suggested the mitigation measure for linear infrastructure.

ii) Current status of wildlife:-

Occasional presence of wildlife in the compartments have been witnessed.

iii) Current status of pressures on Protected Areas:-

The area is not protected area. So all type of biotic pressure exists. There are villages around and therefore cattle population is significant.

iv) Impact of project on wildlife, habitat management and access/use of resource by various stakeholders :-

No impact on wildlife habitat as widening of carriage width would be restricted to 18 meter and no trees would be cut in remaining 4 meter i.e 2 meters on both sides.

v) Contiguous wildlife areas, which would benefit wildlife if added to National Parks/Sanctuary :-

No. Only 4.65 km stretch is passing through Portion of Pranhita WLS along the existing highway width of 7.5 meter. The areas around proposed compartments are active agriculture and habitat and difficult to consider for adding this area in WLS/NP.

vi) Other areas in the State, which have been recommended by State Government, Wildlife Institute of India, BNHS, SACON, IISC, IUCN or other expert body for inclusion in Protected Area Network :-

The areas recommended by Wildlife Institute of India, BNHS, and other stakeholders are considered and majority of the areas have been notified as Protected Areas from 2012 to 2024. Following is the abstract of such area notified as protected areas during 2012 to 2024.

Sr. No.	Particular	Nos.	Area (in Sq.km.)
1	Wildlife Sanctuary	18	2376.30
2	Conservation Reserve	27	1874.42
Total		45	4250.72

Proposals for notification of following Protected Areas are being examined and some are under the consideration of State Government.

PART- IV

(To be completed by the Chief Wildlife Warden within 15 days of the receipt of Part-II and III)

["Proposal for up-gradation of existing NH-353 C to two/four lane with paved shoulders configuration in wildlife passing of Tiger Conservation Plan of TATR from Zamela Nalha to Sironcha in Gadchiroli District of Maharashtra. (TCP of TATR)"]

1	Date of Receipt of Part-II and III by the Chief Wild Life Warden or the officer authorized by him in this regard.	27/05/2024
2	Do you agree with the information and recommendations provided by the officer-in-charge in Part-III.	Yes
3	If not, please provide the reasons.	Not Applicable
4	Have you visited the site yourself and held discussions with the applicant?	No.
5	a) Do you agree that the present proposal for permitting use of NP /WLS area is the best option or only option and is viable?	Yes
	b) Whether proposal subjudice? If yes give details.	N.A.
6	Please provide specific comments w. r. t. Section 29 of the Wildlife (Protection) Act 1972.	As the area does not fall within Wildlife Sanctuary or National Park, there will not be any impact in relation to Sec.29 and Sec.35(6) of Wildlife (Protection) Act 1972.
7	Any other information that you would bring to the notice of the State Board, National Board or its Committee that may be relevant and assist in decision making.	Only small portion of highway is passing through Pranhita WLS. All precautionary measure to created wildlife passage and implement the mitigation measure would be adopted. Employment opportunities created due to this project would certainly reduce the pressure on forests resources in the vicinity. There is no scope of other industries except agriculture and forest as most of the area is covered with forest and therefore increasing the tourism in the area for which road network is

		mandatory and hence upgradation of the road is vital for increasing the potential for Jobs in these areas.
8	Do you recommend the project?	Only small stretch of existing highway with 7.5 width falls in WLS Pranhita and EVL of Pranhita. The compartment covering WLS as well as EVL of Pranhita however are covered under Approved Tiger Conservation Plan of Tadoba -Andhari Tiger Reserve and attract Section 38 V (3) (b) of the said Act, provides for the tiger conservation plan to ensure ecologically compatible land uses in areas linking one protected areas or tiger reserve with another and therefore needs to recommendation of NBWL. As per field inspection 1. Area involved in this project has wild life movements. Widening and construction of highway will witness impacts and so mitigation measures like wildlife passes should be constructed. 2. Sites for wildlife passes and their dimensions have been suggested to agency during joint visit. A separate document of exact points and dimensions will be attached with FCA proposal. It is strongly recommended that WII document for "Eco-friendly measure to mitigate the impact of Linear Infrastructure" should be followed for design of the wildlife passes.
9	Conditions, if any, to be ensured in the interest of wildlife for allowing use of the area.	The proposed project is recommended subject to the following conditions: 1. The project agency should implement all the mitigation measures that are proposed in mitigation plan proposed by Wildlife Institute of India, Dehradun: a. Project is site specific and the compartment covered under TCP is unavoidable as

	project envisage widening of the existing carriage width in existing road. b. Creation of additional employment opportunities which will reduce the pressure on adjoin forest and wildlife. c. User agency has submitted separate proposal along with the Mitigation Plan recommendations of NBWL. 2. No construction work in the night hours 3. Tree cutting would be in strict direction of State Forest Department. 4. Project agency should deposit 2% amount of project cost falling in TCP of Tadoba-Andhari Tiger Reserve shall be deposited by project agency for wildlife conservation and management activities in the State with the Pench Tiger Reserve Conservation Foundation. 5. The project proponent should inform /use "Call Before u Dig" (CBuD) Mobile Application of the Government of India prior to undertaking any type of digging/excavation. Otherwise the digging/excavation will be turned unauthorized. In the State of Maharashtra the Director (IT) of Directorate of Information Technology is State Nodal for CBuD.
