<b>Total</b>		87. 13	

The above-submitted scheme of Rs. 87. 13 lakh is beneficial for Wildlife in terms of management; it is being approved.

Sd/-

(Mahip Gupta)

Principal Chief Conservator of Forests (Wildlife),  
State of Maharashtra

CC: As per the referred letter-1, the said conservation measures plan is sent to the Additional Principal Chief Conservator of Forests and Central Officer, M. R. , for necessary actions. This office agrees to the said conservation measures plan, and the implementation of the mentioned items in the said plan will be carried out by the project system at its own expense. A written guarantee should be obtained from the project system; the original copy of the conservation measures plan is attached.

CC: The necessary information is being forwarded to Additional Principal Chief Conservator of Forests (Wildlife) West, Mumbai, for necessary action.

CC: The necessary information is being forwarded to the Sub-Conservator of Forests (Wildlife) Thane for necessary action.

Department of Forest

Office of the Principal Chief Conservator of Forests (Chief of Forest Force) Maharashtra State

O/o Principal Chief Conservator of Forests (HoFF), Maharashtra State

Phone no. 0712-2560953 Principal Chief Conservator of Forest (Wildlife) Maharashtra State.

Letter-E-mail No. :-Room-23(2)/V. J /Survey/Ward No. 42 / 551 /2024-25 Dated 30/05/2024

To,  
Executive Engineer,  
Maharashtra State Electricity Transmission Co. Ltd.  
MSETCL, Department, Kalyan.  
E-mail ee7620@gmail.com

Subject: - Proposal for Diversion of 12. 7435 ha. Forest land under section-2 of the forest (Conservation) Act, 1980 for construction and laying of 22KV LILOM/C Transmission Line on 220 KV Padghe-Wada-Transmission Line at LOC No. 97 for 220 KV Abitghar Substation passing through Palghar District in the State of MH.

Reference: - 1. Additional Principal Chief Conservator of Forests and, M. R. , his Remarks no. Room- 17/Nodal /Thane/ID-13125(79)/2244, Dated. 05/12/2022.

2. This office's letter no. Room- 23 (2)/V. J. /Survey/Ward No. 146 (Nodal) 2608/2022-23, Dated 15/12/2022.

3. This office's letter no. Room - 23(2) V. J. /Survey/Ward No. 146 (Nodal)/2711/2022-23, Dated 20/12/2022.

4. Letter from Additional Principal Chief Conservator of Forests (Wildlife) West, Mumbai, letter no. Room -3/Land/ FCA/Ward No. 111/81/2024-25, dated 27/05/2024.

About the present subject matter, you are being informed vide Referred letter-1 to the Additional Principal Chief Conservator of Forests and Central Officer, M. R. , has requested to send feedback on the following matter.

*"The proposed transmission line is 1. 608 km of the boundary of the Tansa Wildlife Sanctuary. "*

Accordingly, regarding the submission of a report as to whether any mitigation measures are necessary in terms of wildlife management due to the construction of the said project, and if mitigation measures are required, to submit such a plan, then refer to this office's Referred letter - 2, Additional Principal Chief Conservator of Forests (Wildlife) West, Mumbai; also the Additional Principal Chief Conservator of Forests and Central Officer. M. R. was informed about the Referred letter-3 in the said matter.

Now, in the subject matter prepared by the Conservator of Forests (Wildlife), Thane, this office has received an 'Outlay of the Wildlife Conservation Plan Activities' amounting to Rs. 87. 13 lakhs through the Additional Principal Chief Conservator of Forests (Wildlife) West, Mumbai, with the above Referred letter-4. The salient points of the said Conservation Action Plan are as follows.

**विषय :-** Proposal for Diversion of 12.7435 ha. Forest land under section-2 of the forest (Conservation) Act, 1980 for construction and laying 22 KV LILO M/C Transmission Line on 220 KV Padghe-Wada-transmission Line at LOC No. 97 for 220 KV Abitghar Substation passing through Palghar District in the State of MH.

- संदर्भ :-**
१. अपर प्रधान मुख्य वनसंरक्षक तथा केंद्रस्थ अधिकारी, म.रा. यांचेकडील कार्या. टिप्पणी क्र. कक्ष-१७/नोडल/ठाणे/ID-१३१२५(७९)/२२४४, दि. ०५/१२/२०२२.
  २. या कार्यालयाचे पत्र क्र. कक्ष-२३(२)/वजी/सर्व्हे/प्र.क्र.१४६(नोडल)/२६०८/२०२२-२३, दिनांक १५/१२/२०२२.
  ३. या कार्यालयाचे पत्र क्र. कक्ष-२३(२)/वजी/सर्व्हे/प्र.क्र.१४६(नोडल)/२७११/२०२२-२३, दिनांक २०/१२/२०२२.
  ४. अपर प्रधान मुख्य वनसंरक्षक (वन्यजीव) पश्चिम, मुंबई यांचेकडील पत्र क्र. कक्ष-३/जमीन/FCA/ प्र.क्र.१११/८१/२०२४-२५, दिनांक २७/०५/२०२४.

प्रस्तुत विषयांकित प्रकरणी आपणांस कळविण्यात येते की, संदर्भ पत्र-१ अन्वये अपर प्रधान मुख्य वनसंरक्षक तथा केंद्रस्थ अधिकारी, म.रा. यांनी खालील बाबीवर अभिप्राय पाठविण्याची या कार्यालयास विनंती केलेली होती.

***"The proposed Transmission line is 1.608 km of the boundary of the Tansa Wildlife Sanctuary."***

त्याअनुषंगाने वन्यजीव संरक्षण आणि संवर्धनाच्या दृष्टीने सादर प्रकल्पाच्या उभारणीमूळे वन्यजीव व्यवस्थापनाच्या दृष्टीने काही उपशमन-उपाययोजना आवश्यक आहे किंवा कसे, याबाबत अहवाल सादर करण्याबाबत तसेच उपशमन-उपाययोजना आवश्यक असल्यास, तसा आराखडा तात्काळ सादर करण्याबाबत या कार्यालयाचे संदर्भिय पत्र-२ अन्वये अपर प्रधान मुख्य वनसंरक्षक (वन्यजीव) पश्चिम, मुंबई

यांना कळविण्यात येवून, उपरोक्त संदर्भिय पत्र-३ अन्वये सदर बाब अपर प्रधान मुख्य वनसंरक्षक तथा केंद्रस्थ अधिकारी, म.रा.यांना सुध्दा कळविण्यात आलेली होती.

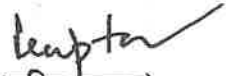

आता, विषयांकित प्रकरणी उपवनसंरक्षक (वन्यजीव), ठाणे यांनी तयार केलेला रू. ८७.१३ लक्ष रक्कमेचा Outlay of the Wildlife Conservation Plan Activities उपरोक्त संदर्भिय पत्र-४ अन्वये अपर प्रधान मुख्य वनसंरक्षक (वन्यजीव) पश्चिम, मुंबई यांचेमार्फत या कार्यालयास प्राप्त झालेला आहे. सदर संवर्धन उपाययोजना आराखड्यातील ठळक बाबी पुढीलप्रमाणे आहेत.

प्रकल्प यंत्रणेने १० वर्षासाठी एकूण रू. ८७.१३ लक्ष आर्थिक तरतूद आराखड्यामध्ये केलेली आहे. बाबनिहाय तपशिल खालीलप्रमाणे आहे.

The Outlay of the Wildlife Conservation Plan for Activities

Sr. No.	Conservation Activities	Amount (in Rs. Lakhs)
1.	Management of Food	17.00
2.	Management of Water	25.19
3.	Management of Shelter	11.47
4.	Eco Development	6.00
5.	Conservation of Wildlife in Protected Areas	13.50
6.	Awareness and Training Programme	6.45
7.	Miscellaneous Activity	7.52
<b>Total</b>		<b>87.13</b>

वरीलप्रमाणे सादर करण्यात आलेला रू. ८७.१३ लक्ष रक्कमेचा आराखडा वन्यजीव व्यवस्थापनाच्या दृष्टीने पोषक स्वरूपाचा असल्यामुळे, त्यांस मान्यता प्रदान करण्यात येत आहे.

  
(महिप गुप्ता)

प्रधान मुख्य वनसंरक्षक (वन्यजीव),  
महाराष्ट्र राज्य

प्रतिलिपी : अपर प्रधान मुख्य वनसंरक्षक तथा केंद्रस्थ अधिकारी, म.रा. यांना संदर्भिय पत्र-१ चे अनुषंगाने माहितीस व आवश्यक कार्यवाहीस अग्रेषित. सदर संवर्धन उपाययोजना आराखड्यास या कार्यालयाची सहमती असून, सदरहू आराखड्यातील नमूद बाबींची अंमलबजावणी प्रकल्प यंत्रणा स्वखर्चाने कार्यान्वीत करेल, अशा आशयाचे लिखित हमीपत्र प्रकल्प यंत्रणेकडून प्राप्त करून घ्यावे. संवर्धन उपाययोजना आराखड्याची १ मुळ प्रत सहपत्रीत करण्यात येत आहे.

प्रतिलिपी : अपर प्रधान मुख्य वनसंरक्षक (वन्यजीव) पश्चिम, मुंबई यांना माहितीस व आवश्यक कार्यवाहीस अग्रेषित.

प्रतिलिपी : उपवनसंरक्षक (वन्यजीव), ठाणे यांना माहितीस व आवश्यक कार्यवाहीस अग्रेषित.

# Mitigation Measures for Construction of 220 kv LLO transmission line Abitghar Substation Electricity Transmission Line

## For Eco Sensitive zone and Forest areas

Forest Conservation and  
Environmental Sustainability Unit

By:  **Conservator of Forest**  
(Wildlife) Thane

## 1. At a Glance

Name of project for which Wt clearance is required	Construction of 220 kV transmission line from Padghe to Wada in Palghar district, Maharashtra.
Total Line length	8.52 Km
Total line length thru forest area	2.3 Km
Details of wildlife area involved	Eco Sensitive Zone of Tansa Wildlife Sanctuary
Total forest area to be affected	12.74 Hectare

## 2. Project Background

Construction of 220 KV D/C LHO transmission line from Padghe to Wada in Palghar district, Maharashtra is proposed. This proposed line crisscrosses the forest which is part of Ecologically Sensitive Area of Tansa Wildlife Sanctuary in Jawhar forest division. Total length of transmission line power is 8.523 km. out of which 2.3 km line will be passing through reserve forest area which is a Eco Sensitive zone. The forest areas in Palghar district, from where the transmission line is proposed is a part of wildlife corridor which connects Tansa Wildlife Sanctuary to Nandanl reserve forest and Tungarashwar Wildlife Sanctuary.

## 3. Tansa Wildlife Sanctuary

Tansa wildlife sanctuary is situated in Thane district of Maharashtra state and lies between 19°35' and 19°55' north latitude and 73°20' and 73°35' east longitude. It is about 90 km by road from Bombay. Tansa wildlife sanctuary was established in 1970. At that time its area was 216.75 sq. km, but later in 1985 it was extended to 304.81 sq. km.

### 3.1 Flora

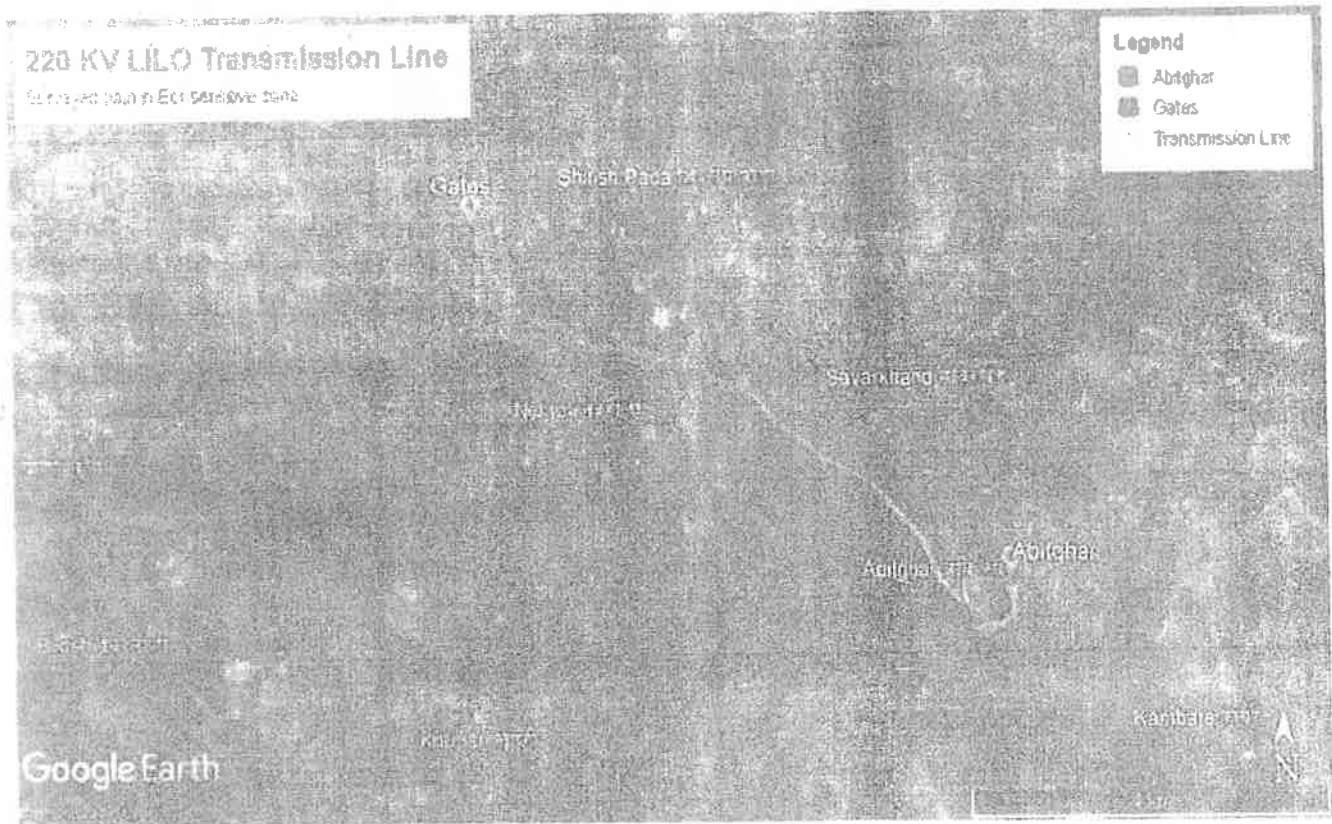

The forest of Tansa is Tropical moist deciduous type of forest with occasional patches of Tropical Dry Deciduous Forest in the south-east part of the sanctuary and comprises mainly of: Teak *Tectona grandis* is the main dominant species with other associated species such as *Acacia catechu*, *Anogeissus latifolia*, *Budelia retusa*, *Butea monosperma*, *Dalbergia latifolia*, *Dillenia pentagyna*, *Diosyros melanoxylon*, *Hymenoclecyon arborescens*, *Lagerstroemia parviflora*, *Lannea coromandelica*, *Mitragyna parviflora*, *Pterocarpus marsupium*, and other tree species along with bamboo species *Bambusa spinosa* and *Dendrocalamus strictus*.

### 3.2 Fauna:

Tansa wildlife sanctuary contains a variety of fauna. Over 50 species of mammals are known to inhabit this sanctuary. 65 species of birds have been recorded. Tigers have been reported from Suryamal range only in the northern part of the sanctuary back in 1990s while leopards prefer the hilly areas on the sanctuary. The lesser cats such as the leopard cat and palm civet are also found, The Jackal is commonly seen. (About 212 birds); Birds have been recorded from Tansa (S. Laad pers comm. 2003; Maharashtra Forest Dept Un-publ. Checklist 1996). Birds observed at buffer area of Tansa during rapid survey is in annexure I.

#### 4. Transmission Line of 220 KV

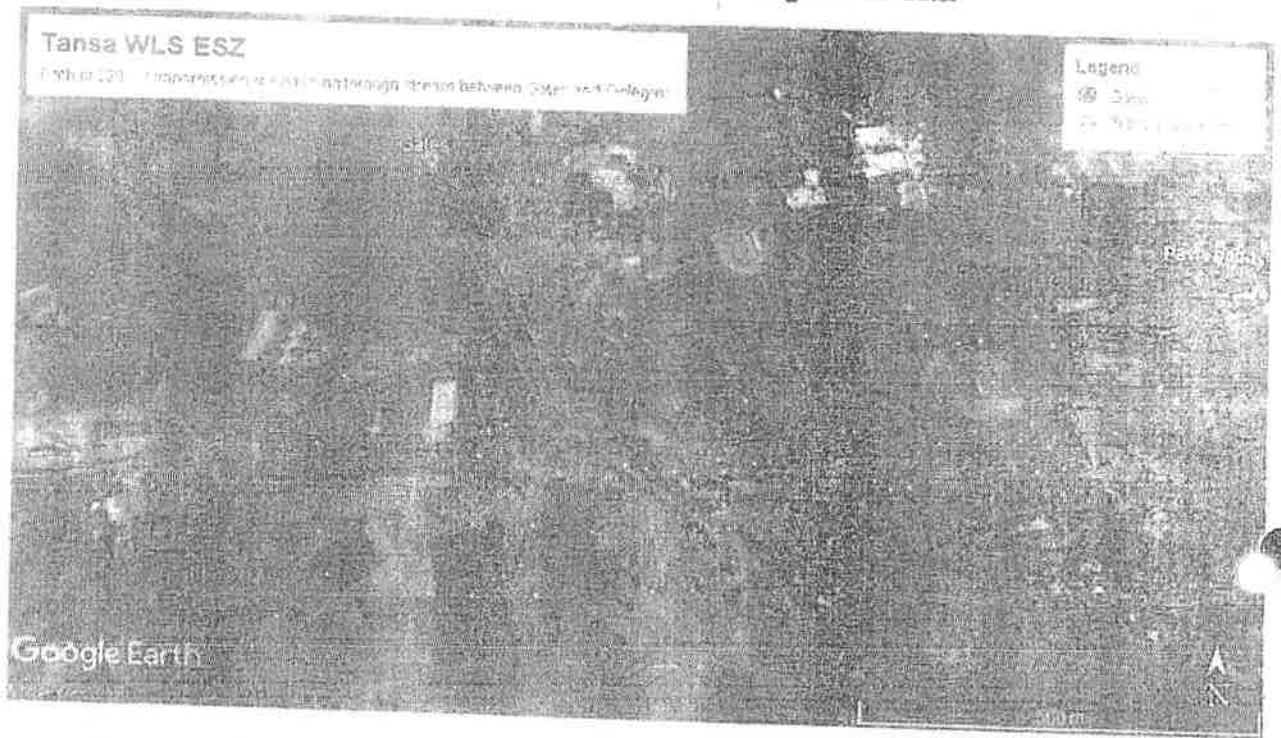

a. Path of the transmission line

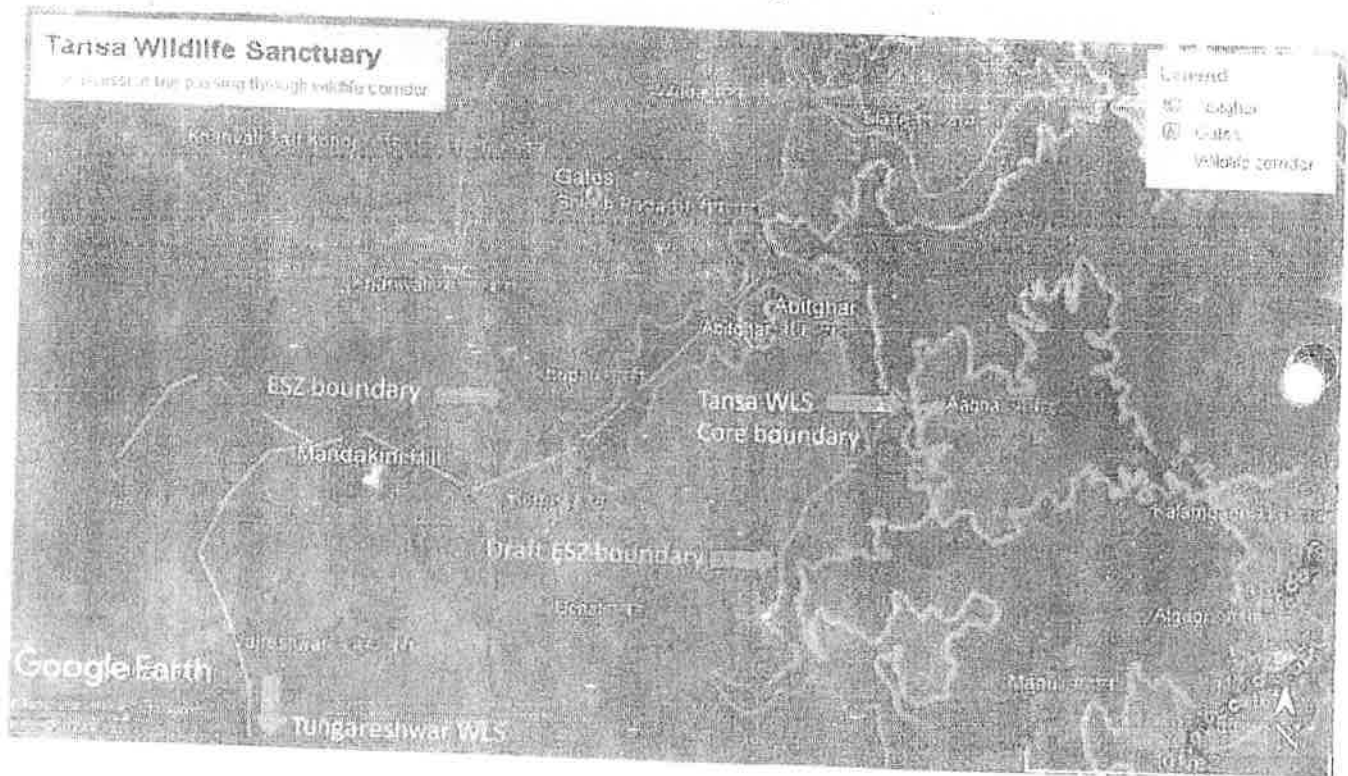

hasan

b. The transmission line crossing a river stream

Goleghar and Gates

c. The transmission line crossing wildlife corridor at Goleghar

FOREST

Powerlines are known to affect many different animal groups, predominantly birds. As the proposed line being 220 kV belong to the high voltage level and will be laid in eco sensitive area where the natural environment is easily harmed by disturbances, specific mitigation measures need to be employed to reduce wildlife mortality due to power transmission lines.

The construction of a transmission line involves both long-term and temporary impacts. Long-term impacts can exist as long as the line is in place and include land use restrictions, loss of natural habitat and impacts on biodiversity.

Temporary impacts occur during construction or at infrequent intervals such as during line repair or right-of-way (ROW) maintenance. The temporary impacts include noise or crop damage during construction. Short-term impacts can become long-term impacts if not properly managed or mitigated.

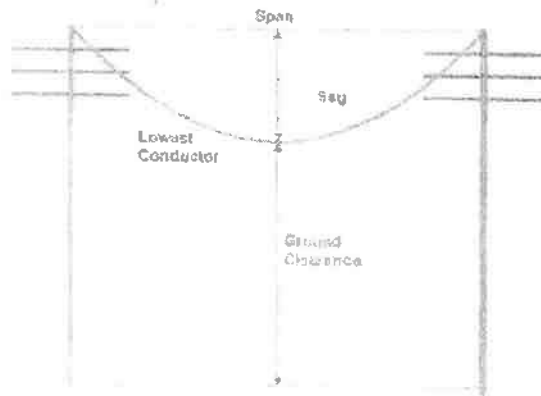

This report has mitigation measures including site-specific mitigation measures which are critical to mitigate adverse effects of high voltage transmission lines on wildlife and the habitat.

### 5. Likely Impacts on the wildlife and forest -

1. The most prominent impact being habitat fragmentation & degradation of wildlife habitats along the transmission line.
2. The large-scale felling of trees along the line corridor might impact the nesting sites of birds as well as habitat and movement of other arboreal species like monkeys, primates, giant squirrel present in that area.
3. Collusion of birds are mostly reported during landing and takeoff in area close to water bodies, designated bird areas or wildlife sanctuary having large congregation of birds
4. Construction manpower will be required for execution of the project and makeshift construction camps and might be set up at the tower foundation/erection sites. Generally, local manpower/workers will be engaged. There is a likelihood of involvement in hunting/trafficking of wild animals and other unlawful activity during the execution of the project.

### 6. Mitigation Measures for construction of 220 kv D/C transmission line in the wildlife Corridor will be-

1. The minimum ground clearance for a 220 kV transmission line is 7m. In addition to this, it is proposed to maintain additional clearance 3 meters over and above minimum clearance above ground from the lowest conductor of transmission line in the Wildlife Corridor.

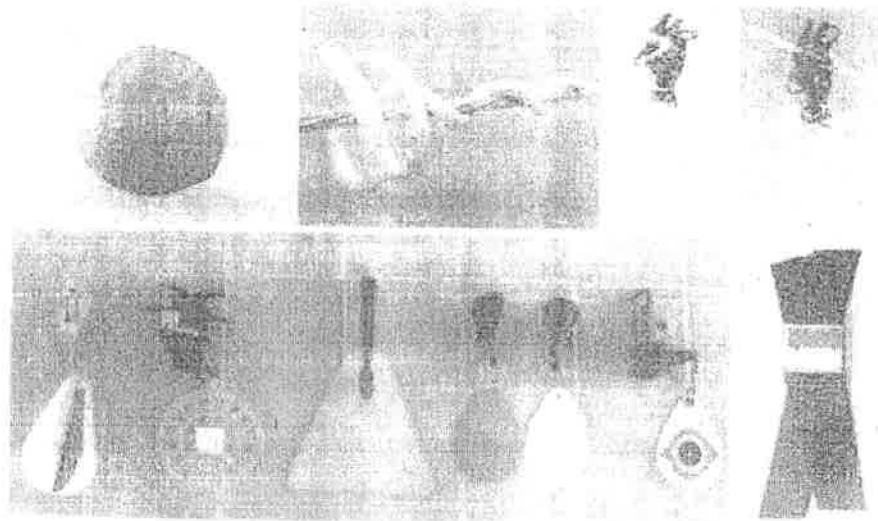

- 35
- 16
2. The Stringing of conductor for the transmission line shall be carried out maintaining a separation between energized conductors as follows:

Vertical distance between two conductors: 4 m (appx.)

The above arrangement will nullify the likelihood of electrocution of large, winged birds like hornbill, Owls because the distance between energized conductors will be always more than the maximum wingspan of the bird.

3. To prevent accidental collision of birds with the conductor bird diverter/colored/contrast marker devices will be installed on the earth wire to make it visible to birds, as shown in picture below.

4. The excavated pits shall be properly barricaded and fenced to prevent accidental falling of mammals.

## 7. Mitigation Measures for construction of 220 kv D/C transmission line in the Eco sensitive Zone and forest area:

1. Where routing of transmission lines through the forest areas cannot be avoided, these should be aligned in such a way that it involves the least amount of tree cutting
  2. As far as Possible, the route alignment through forest areas should not have any fine deviation.
  3. As the current line passes through wildlife corridor, transmission lines to be constructed in where adequate clearance is already available. trees shall not be cut except where is absolutely required.
  4. The transmission line will be crossing a stream channels Coleghar and Gates. This channel must not be disturbed or diverted while laying the power lines.
- 10/10/20

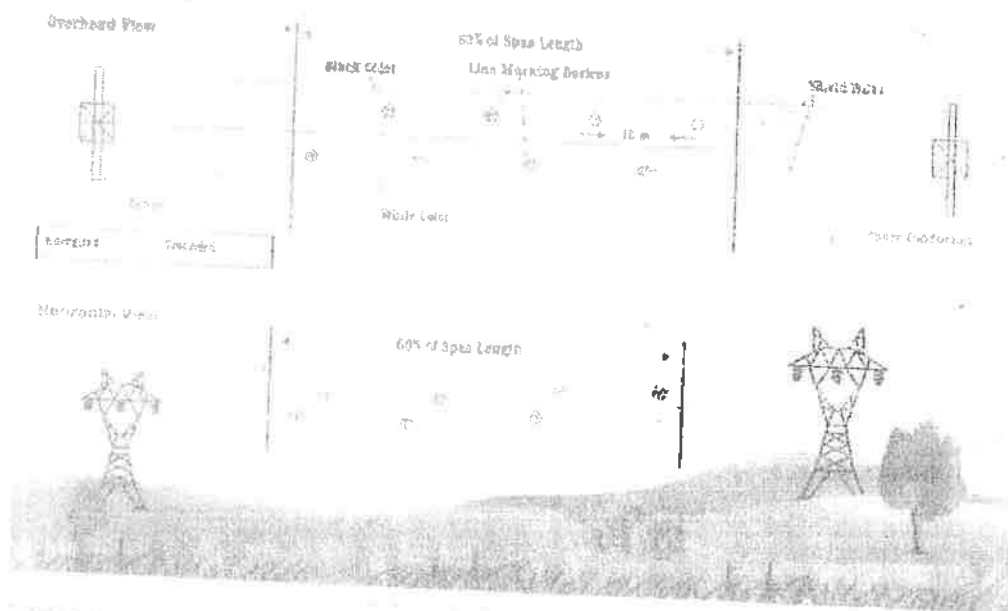

5. Shrub/scrub areas along streams are a valuable buffer and corridors of natural habitats. Existing vegetative buffers should be left undisturbed or minimally disturbed, whenever possible. For areas where construction impacts cannot be avoided, low-growing native tree and shrub buffers along these streams should be allowed to regrow and/or same species should be replanted so as to maintain the pre-construction water quality in the streams and wetlands.
6. Adjust pole placements to span wetlands or limit equipment access in wetlands, wherever possible.
7. To avoid spreading of invasive species by construction disturbances, the cleared strip under the transmission line should be restored with local, native, ecologically suitable shrub species. Ecologists should be consulted for the plant selection.
8. Annual surveying for new populations of invasive species caused by construction disturbances should be carried out. Weeds or invasive species should be removed from the cleared area annually before their flowering and fruiting. If unchecked, invasive species will likely spread and impact natural habitat. Each exotic or invasive species requires its own protocol for control or elimination. Expert should be consulted to determine the best methods for control of encountered invasive species.
9. Ensure ground clearance of 7 m and maintenance of this ground clearance for the 220 KV transmission line.
10. Insulated conductors must be used to prevent electrocution of animals.
11. Polymer insulation cables should be used on ground wires, cross arms and jumper wires.
12. Suitable Guard Spikes at the height of 4-7 feet to ward off animals from coming near or rubbing against poles.
13. Power lines must be marked to make them more visible and help prevent contact with them.
14. Sufficient separation must be kept between phases and grounded hardware.
15. Insulated cables must be used wherever separation between the energized phase conductors are not possible.
16. Switches should be designed such that perching by birds on switch gear should be prevented.
17. Insulated perches should be provided wherever possible. In order to make the perches effective, it is advisable to construct the tower or install means which will make it difficult or impossible for the bird to alight on other portions of the tower other than the insulated perch.
18. Bird Flight Diverter must be installed on all conductors and earth wire/ OPGW to avoid the chances of collision of birds. These diverter should be dynamic type and shall consist of warning disc and associated clamps & connectors. These diverters should have solar powered LED which is preferred as foggy/dusty weather persists or intensity of light is low in valleys and forests

### 7.1 Specifications of the Bird Flight Diverter:

- a. For Bird flight Diverter installation, one bird flight diverter shall be installed at every 10 Meter on the earth wire / Optical Ground Wire (OPGW) and one bird flight diverter shall be installed at every 15 m on phase conductors in a staggered way such that as a whole, the power line will have effectively one diverter at every 5m to 6m. In case of bundled conductors, bird flight diverters may be installed on the lower conductor of the bundle in staggered manner.

For the proposed line passing from forest and eco sensitive zone, that is 2.3 km or 2300 m total 460 Bird Flight Diverters should be installed.

- b. For Bird Flight Diverter installation stretches can be identified with local ecologists on field.
- c. For visibility of Bird Flight Diverter, a warning disc should be provided.

Note. This is a reference image from another area. Can be referred for designing and installation

**7.2 For Warning disc, requirements shall be:**

- a. have glow in dark feature. Glow in dark shall remain activated for at least 12 hours after exposure to sun light. If glow in dark stickers are used, the same shall be laminated and suitable for all weather conditions.
- b. Have contrasting coloured, combination of any two colours from Red, Yellow, Orange, White, retro-reflective surface with Sun and Moon light reflectors on both faces. Since, warning disc is to be designed to rotate, the colour change, while revolving, shall provide significant forewarning.
- c. To swing, sway and rotate easily warning disc must be made of UV stabilized plastic. Bearing shall be made of stainless steel and should allow free spinning in minimum wind speed of 2 km/hour.
- d. Have diameter not less than 150 mm for circular disc. If warning disc is quadrilateral or trapezoid or of any other shape, then shortest arm length shall not be less than 90 mm and total surface area of warning disc should not be less than 15,000 mm<sup>2</sup> (including air vents). Disk thickness should not be less than 3 mm.
- e. The clamp for holding conductor/OPGW/earth wire shall be spring type and shall be made of UV stabilized engineered composite plastic (polymer) or metal and shall be suitable for live line installation by hot stick or drone.
- f. All metal hardware used in Bird Flight Diverter including bearing must be made of corrosion free material
- g. All plastic (polymer) parts must be UV stabilized
- h. Clamp must be suitable for gripping the conductor/OPGW/earth wire strongly, otherwise due to aeolian vibrations/high wind speed diverters may shift and move from its original position and get collected at mid span (lowest sagging point). Rubber/polyurethane lining shall be used in gripping area of clamp as per requirement of conductor type

**7.3 For solar powered LED type diverter, following additional requirement shall be fulfilled:**

- a. LED shall be of orange colour with adequate light intensity so that it is clearly visible to birds from a distance even during foggy/dusty weather/under low intensity of light
- b. Battery shall be guaranteed for service life of 5 years and shall be suitable for at least 100 hrs of flashing operation by single charge
- c. An automatic power cut-off electronics circuit shall be provided to improve battery life so that during daytime (due to high intensity of light from sun), the circuit gets cut off & stops flashing and the circuit switches on automatically under low intensity light condition.

#### 7.4 Additional mitigation measures to minimize adverse impacts:

1. Before start of work in the TANSA eco sensitive zone awareness campaign should be taken up by the power line laying company jointly with Forest Dept. to create maximum awareness among the construction workers regarding safety and forest and wildlife.
2. Constructing when the vegetation is dormant, from Oct-March, to minimize impacts. Construction should be avoided in flowering and fruiting season (April-May).
3. To minimize the disturbance to wildlife, no new approach road will be constructed in the forest area. The existing village tracks/paths will be utilized for carrying of tower materials and also manual excavation of tower foundation should be done.
4. Installing and maintaining proper erosion controls during construction to minimize run-off of topsoil and disturbances to wetlands.
5. Minor adjustments in pole locations should be considered to avoid ecologically important areas like streams, wetlands and likewise.
6. Post construction of line, nearby wetlands should be restored, if any disturbance might have happened due to work.
7. An expert be present during construction activities and implement mitigation measures properly.
8. While laying the transmission line, forest rules and regulation must be followed, which are:
  - i. Work hours to be limited between 8 am to 6 pm
  - ii. No personnel can stay back in the forest area beyond the said timing
  - iii. Manpower is allowed to access the designated area only and cannot venture into other areas within the forest
  - iv. Post works any waste generated at site should be removed and disposed off suitably.
  - v. Any instruction given by Forest Dept. personnel at site should be adhered to.
  - vi. Any infrastructure at site or within the sanctuary shouldn't be damaged.
  - vii. In case of any damage then it should be repaired by the transmission laying party at their own cost.
  - viii. Wildlife around the area shouldn't be disturbed or harmed in any way
  - ix. Keep distance with wild animals
  - x. Do not litter
  - xi. Do not smoke or kindle a fire
  - xii. Do not feed wildlife

## Annexure 1:

Tansa Buffer Zone Birds			
Sl. No	Common Name	Scientific Name	Family Name
1	Indian Peafowl	<i>Pavo cristatus</i>	Phasianidae
2	Cattle Egret	<i>Bubulcus ibis</i>	Ardeidae
3	Indian Pond Heron	<i>Ardeola grayii</i>	Ardeidae
4	Common Iora	<i>Aegithina tiphia</i>	Aegithinidae
5	Little Cormorant	<i>Microcorbo niger</i>	Phalacrocoracidae
6	Shikra	<i>Accipiter badius</i>	Accipitridae
7	Crested Serpent Eagle	<i>Spilornis cheela</i>	Accipitridae
8	Spotted Dove	<i>Spilopelia chinensis</i>	Columbidae
