- To add greenery and maintain aesthetic value along road side.
- To restocking of the plants against the tree cutting

❖ **NAME OF THE PLANTATION SITE:**

- Nuagaon to Gochhabari 3 Rkm.
- Sahajpal to Dambarugarh 10 Rkm.
- Janhapank to Jagati & Jagati to Telibandh via Bank of river Mahanadi over 36 Rkm.

❖ **PLANTING TECHNIQUE:**

• **SURVEY & DEMARCATION:**

The area should be surveyed in the field using G.P.S. system. The plantation area to be indicated by sign boards at corners or at point of intersection with roads. The sign boards should contain the name of the plantation site, area, year of planting, planting module, No. of seedlings planted & other details, if necessary.

• **ALIGNMENT AND STACKING:**

Alignment, stacking and pitting will be taken up in the month of January-February, Pits of size 45 cm X 45 cm X 45 cm will be dug with a spacement of 4 mtrs.

• **RAISING OF NURSERY:**

Seedlings required for this plantation shall be raised in the Permanent nursery, which is the perennial source of seedling and 10% extra seedlings shall be raised to compensate and mitigate the eventuality of seedling casualty in the nursery. Standard nursery practices shall be followed for raising of seedlings in polythene bags. Permanent gaps need to be assessed well in advance where plantation can be done.

• **PLANTING & POST-PLANTING OPERATION:**

The road side will be re-stocked by way of raising 12250 nos. plant in Avenue model. Taking into consideration of the soil condition and existing species growing there naturally, the following species are proposed to be planted in dug out pits of 45 cm X 45 cm X 45 cm maintaining a spacing of 4 mt. between the pits. Plantation should be taken up after first regular shower of monsoon and should ideally be completed by

end of July. NPK/DAP fertilizer @ 50 gms per plant should be given as basal dose. Anti-termite and insecticide @ 5 gms. per plant should be applied per pit while planting. Casualty replacement whenever required during the planting year and in the subsequent years up to third year should be undertaken for which the seedlings shall be raised and kept in stock at site as well as in the nursery..
