Sub:-

Diversion of 10.906 Ha. of Forest Land for Construction of 132KV DC Line on DC tower from existing 132/33 KV Phulbani Grid Sub-Station in Kandhamal Dist. to 132/33 KV Grid Sub-station Boudh in Boudh Dist., Odisha - Submission of Show Cause regd.

Sir,

With reference to the subject cited above, during the course of Joint Site Inspection held on dt. 13.04.2023 by the Forest & Revenue officials, it was observed that the towers have been erected with transmission line in Revenue Forest kissam land proposed for diversion without prior approval of the competent authority. Hence, from the circumstantial evidence you have been found prima facie guilty in contravention of section (2) of Forest Conservator of Act, 1980.

The above violation attracts the provisions of Para 1.21 (i) (a) which states "a. *The diversion of forest land for non-forestry purposes without the prior approval of the competent authority in the State will be dealt under the provisions of Indian Forest Act 1927 and other State Acts dealing with the conservation of Forests by the State government concerned. The land in question will not be considered as diverted under FCA 1980 and the status of the land shall continue to be forest.*"

P.T.O

In view of the above, it is asked upon to show cause as to why legal action shall not be taken as per prevailing laws. Your reply should reach this office immediately for taking further course of action at this end.

Yours Sincerely,

Divisional Forest Officer

PROJECT IN BRIEF

1.	Project	Diversion of 30.469 Ha. of forest land for construction of 132/33 KV DC line on DC tower from existing 132/33 KV Phulbani Grid Sub-Station to 132/33 KV Grid Sub-station at Boudh by OPTCL, Angul, Odisha
2.	Project Area	The Proposed transmission line passes through the Phulbani & Boudh Forest Division over 30.469 Ha of Forest land (Phulbani Division 19.563 Ha. + Boudh Division 10.906 Ha.).
3.	Total Forest Area required in Boudh Forest Division	10.906 Ha.
4.	Implementing Agency	Boudh Forest Division

PROJECT OVERVIEW

Ministry of Environment, Forest and Climate Change, Govt of India, Eastern Regional Office, Bhubaneswar has granted Stage-I Forest Approval for diversion of 30.469 Ha of Forest land (Phulbani Division 19.563 Ha. + Boudh Division 10.906 Ha.) for construction of 132/33 KV DC line on DC tower from existing 132/33 KV Phulbani Grid Sub-Station to 132/33 KV Grid Sub-station at Boudh by OPTCL, Angul, Odisha vide their letter No.5-ORC592/2023-BHU dt. 27.11.2024, and stipulated some conditions. As per condition No. 14(iv) of MoEF & CC, IRO, Bhubaneswar, the user agency in consultation with State Forest Department shall prepare a detailed scheme for creation and maintenance of plantation of dwarf species (preferably medicinal species) in right of the way under the transmission line, and provide funds for execution of the said scheme by the State Forest Department.

PROJECT JUSTIFICATION

The rationale behind this entire effort is to utilize the affected areas maximally for raising green cover with dwarf plants, easy to grow, require little care and maintenance at the same time having economic importance. Also, their height would be such as not to interfere with the smooth transmission of electricity through the proposed construction of transmission lines. Efforts would be made to plant species in multi-tier such that benefits can be accrued throughout the year, ensuring maximum survival, growth and return there from.

OBJECTIVES AND METHODOLOGY

The overall objectives of the project are as mentioned below: -

- Awareness generation among different stakeholders of the project (M/s OPTCL, the local communities, the Forest Department etc.) regarding the need to maintain the biodiversity of the region when there is diversion of forest land for non-forestry purposes.
- Plantation and providing post-plantation care and protection, so that local communities may reap benefits from this economic species.
- Develop replicable and viable models of plantation with careful selection of species.

METHODOLOGY OF IMPLEMENTATION

The Dwarf Plantation Scheme will be implemented by Boudh Forest Division taking into consideration the following conditions.

PROJECT COMPONENTS

Plantation of dwarf / medicinal plant shall be taken up @ 1000 plants/Ha. under the RoW of the transmission line in strip width of 27 mtr. along the total length of 4.040 kms. Thus, the area comes to **(4040 mtr. x 27 Mtr. /10000) = 10.906 Ha.** and a total 10906 Nos. of plants to be planted over 10.906 Ha.

Raising of Nursery

As the projects come under the jurisdiction of Boudh Range, raising of planting stock along with seedlings for causality replacement shall be carried out simultaneously in the polypots of size 10" x 12". Potting mixture shall be prepared very carefully as success of planting depends upon the quality of seedlings raised. The soil mixture shall be of earth, washed river sand and manure in the portion of 2:1:1. Any manure used shall be free of white ants etc. Watering to seedlings shall ordinarily be done in the afternoon. Regular weeding should be done. In the nursery, there is every possibility of escaping roots from the polypots which should be regularly trimmed.

Digging of pits

Alignment, stacking and pitting shall be taken up in the month of November. Digging of pits shall be completed in the month preceding the planting season preferably in May. The dimension of the pits shall be 30 cm x 30 cm x 30 cm. While digging the pits, the top half

soil shall be kept separately. At the time of planting the top soil kept separately shall be put on the bottom of the pits. Areas liable to inundation or water logging shall be raised into mounds for planting. The size of the mound shall be such that it is not washed during rains.

Planting

18 months old seedlings shall be planted. Pots shall be handled very carefully, so that the ball of earth is not broken. At the time of planting, the pits shall be applied with biofertilizer, vermicompost & sprinkled with bio-insecticide. The soil around the plant shall be well compacted with the help of foot. The earth close to the stem of seedling shall be slightly elevated, so that rain water does not accumulate.

Weeding & Soil working

Regular weeding & soil working is essential for a successful plantation. Weeding shall be started immediately after planting is over. Grasses and weeds shall be scrapped around the plants with a radius of 0.5 mtr. The soil around the plants shall be loosened carefully for better aeration.

Manuring

Biofertilizers 50 Grams/Plant can be applied by making 3 holes with the help of crowbar. Vermicompost 70 gm / plant in two subsequent doses shall be provided per plant in the first year. Sometimes influx of insects and pests into the planting area causes heavy damage to the soft & tender part of the seedlings. They usually damage the growing parts of the plant. To avoid such damage foliar spray with bio-pesticides should be done at regular intervals.

Protection from grazing & fire

As medicinal plants are planted, it should be firmly protected from grazing, browsing & fire. Plantation watchers are to be deployed for protection of plants from biotic pressure & Fencing with Angle Iron & Chain Link wire mesh. Fire line ought to be laid out and cleared during summer season.

Subsequent Maintenance & Management

The Success of any project depends on the adherence to all project components properly. In the plantation related activities such as, post plantation care & maintenance are the integral part of the entire exercise. Boudh Forest Division would implement the project & also maintain after the project period is over. Plantation shall be maintained up to 10 years.

Special soil conservation measures

The project site requires some soil & moisture conservation measures. Moisture conservation is necessary to protect the plant from drought. It has been proposed to provide half-moon trenches on the uphill side of the pit. The entire area shall be saturated with Soil Moisture Conservation (SMC) measures.

Socio-economic Benefits

The villages will derive lots of tangible and non-tangible benefit from the project by engaging themselves in the plantation activities for a period of 10 years.

Ecological Benefits

Plantation of medicinal species in the affected areas will result in increasing the biodiversity of the area along with checking the soil erosion and subsequent loss of valuable soil cover from the forest area. In the absence of this project, it would be subjected to vagaries of weather which ultimately devoid all vegetative cover.

Provision of Funds and Fund Utilization

The User Agency i.e. Deputy General Manager (Elect), EHT (Const.) Division, Angul shall deposit the funds on approval of the scheme in Ad-hoc CAMPA Account and the funds will be utilised for raising of plantation of dwarf species in right of way (ROW) under proposed 132 KV transmission line by the Divisional Forest Officer, Boudh Division on allotment by the Principal Chief Conservator of Forests & HoFF, Odisha, Bhubaneswar.

Note:

- 1 Priority must be given to the indigenous local species available nearby to the site of plantation.
- 2 10% indigenous fruit bearing trees must be preferred to Plantation.
- 3 Site specific Soil conservation work like LBCD, Gully Plugging, Staggered Trench, Contour Trench, Graded Bund, etc. may be taken up
- 4 Chain link fencing can be adopted in the CA plantation taken up outside the forest area and Bamboo twigs fencing may be preferred
- 5 Watering facilities for procurement of water & watering may be adopted as per the availability of water.
- 6 The Cost Norm of various items can be changed with the approval of the concerned RCCPs keeping the overall cost norm fixed for each Financial Year

FORM-1

(For Linear Projects)

Government of Odisha

Office of the District Magistrate & Collector, Boudh

No. 125 /SSD, Dated. 19/4/24

TO WHOM SO EVER IT MAY CONCERN

In compliance of the Ministry of Environment and Forests (MoEF), Government of India's Letter No. 11-9/98-FC (pt) dated 3rd August 2009 and Ministry of Forest, Environment & Climate Change Department (FE&CC), Government of Odisha Letter No. EF-DIV-FLD-0072-2023-16851/FE & CC, on DT- 08.08.2023 wherein the MoEF issued guideline on submission of evidence for having initiated and completed the process of settlement of rights under the Schedule Tribes and Other Traditional Forest Dwellers (Recognition of Forest Right) Act, 2006 (FRA for short) on the forest and proposed to be diverted for non forest purposes read with MoEF letter dated 5th February 2013 wherein MoEF issued certain relaxation in respect of linear projects, it is certified that 10.906 hectare of forest land and proposed to be diverted in favour of OPTCL, Angul for construction of 132/33 KV DC line on DC tower from existing 132/33 KV, Phulbani Grid Sub-station to 132/33KV Grid Sub-Station at Boudh by OPTCL, Angul, Odisha in Boudh district falls within jurisdiction of 1. Durgaprasad, 2. Amthapada, 3. Nuapada, 4. Bhuktapada, 5. Rengali, 6. Samapaju, 7. Nuapali & 8. Kanakpur in Boudh Tahasil and 1. Birigarh, 2. Basantabahal & 3. Menda in Harabhanga Tahasil.

It is further certified that:

- (a) The complete process for identification and settlement of rights under FRA has been carried out for the entire 10.906 hectares of forest area proposed for diversion. A copy of records of all consultations and meetings of the Forest Rights Committee(s), Gram Sabha(s), Sub-Division Level Committee(s) and the District Level Committee are not required as per Recognition of Forest Right Act, 2006 read with GOI Letter No. 11-9/98 FC (pt) dated 05.02.2013.
- (b) The diversion of forest land for facilities managed by the Government as required under section 3(2) of the FRA have been completed and the Grama Sabhas and their consent to it did not required.
- (c) The proposal does not involve recognized right of Primitive Tribal Groups and Pre-agricultural communities.

Thus as per letter MoEF dated 5th February 2013 the resolution of Grama Sabha for linear projects is not required.
