	two sites. It is more likely to be construed as if the	Kodatarai in Raigarh District. At presen
	user agency has explored site Balrampur District	scenario power supply of Raigarh distri- Kodatarai & nearby areas is meet or
	and the same subsequently shifted to revenue	through existing 33 KV, 11 KV lines an
	forestland in Raigarh district. Comments on the same may be furnished.	33/11 KV, 11/0.4 KV s/s. The length of
	same may be furnished.	existing 33 KV, 11 KV lines are too lon
		hence, these area facing continues lovoltage problem, frequent failure of suppl
		& excessive line losses.
		Since the kodatarai is situated at Loa
		centre of area, thus the proposed projective is selected for construction of 132/3
		kV s/s. Further, the proposed land is we
		leveled ground consisting of good loa
-	- 1	bearing capacity soil (hard Yellow Sand

			soil) and has no water body in nearby area, reducing the risk of water logging. Connected to the main road. The proposed land is situated very far from any near by RF/PF. For feeding 132 KV electric supply to this s/s in the route of 132 KV transmission line no forest land is encountered. In view of above constrains, the proposed land for construction of 132/33 KV s/s is technically most suitable and feasible and fulfill all technical and economical criteria for the Project (प्रदर्श-7).
Х	ciii	Original copy of the District Collector certificate in accordance with the MoEF& CC's guidelines dated 17.11.2016, may be submitted by the State Govt.	कलेक्टर का वन अधिकार प्रमाण पत्र की मूल प्रति संलग्न है (प्रदर्श-8)।
,	(iv	The detail of 33/11 KV Ambikapur Transmission line including detail of any forest area diverted in the line may also be submitted.	The associated 132 KV Transmission Line to be constricted for feeding supply to proposed 132/33 KV sub station Kondatarai by making line in line out (LILO) arrangement of existing 132 KV Raigarh - Sarangarh line up to proposed sub station and there is no forest land encountered in the route of proposed transmission line. Hence there is no forest land diversion is needed for transmission line.
