(Online No- FP/UK/ROAD/153125/ 2022)

सन्दर्भ:- पाक्षिक क्षेत्रीय समन्वयक बैठक का कार्यवृत्त भारत सरकार का पत्रांक -IRO/DDN/FRCM/01/2022/1457, दिनांक 30.01.2023।

महोदय,

उपरोक्त विषयक संदर्भित पत्र के क्रम में पाक्षिक क्षेत्रीय समन्वयक बैठक में भारत सरकार द्वारा चाही गई 03 बिन्दुओं से सम्बन्धित सूचना प्रभागीय वनाधिकारी हरिद्वार ने अपने कार्यालय पत्रांक- 402/12-1 दिनांक-31/07/2024 से निम्न प्रकार इस कार्यालय को प्रस्तुत की है:-

क्र०	भारत सरकार द्वारा चाही गई वांछित सूचना	अनुपालन आख्या
1	Project proponent is requested to re-assess the technical requirement of drainage at specific sites in view of the width and diversion area of the road.	The User Agency has informed that Roorkee-Laksar- Balawali motor road (sh-26) passes through highly dense populated areas, such as Dhandhera, Nagla Imarti, Landhora, Basedi and laksar etc. Drainage of domestic and Monsoon run off discharge is a vast problem in all the habitations and having water logging in most of the habitations during Monsoon season. Sanction for strengthening and widening work of km. 1 to 19 of this road has been granted under Central Road infrastructure fund. Drainage work of habituated areas lying on the road, is also provisioned along both sides of the road. But the land having been the reserve forest land, the drainage work cannot be taken up, until the transfer of forest land. Further it is also to mention, that as per the actual minimum requirement of land for construction of drains and accordingly minimum requirement of felling the trees, the proposal have been re- assessed and the minimum required number of trees i.e. 527 in lieu of 984, have been taken.
2	Forest Department is requested to inspect the site in view of point no. 1 and submit the actual no. of trees to be cut.	The proposed area was again inspected by the proponent department and the forest department. According to the earlier census of trees, instead of 984 trees, only 527 trees were found eligible for felling, information about which has also been uploaded/amended on the online portal. (Information Annexure-1)

03 Reply to observation made by this office vide EDS letter dt. 09.01.2023 is required to be submitted covering observation as follows: -

(i)	It was submitted that total The User Agency has informed that Roorkee-Laksar- Non-Forest Land is 40.71 ha. State Govt. is requested to provide information at para B in Part I.	Balawali motor road (SH-26) exists prior to year 1960. Total area of R.O.W. held by this road was 48.03 Hectares out of which 7.32 Hectares land (2-meter-wide strip on both side of road) were declared as reserve forest land vide G.O No. 115/XVI/331-50 dated 10.02.1960. Hence that net non-forest land area currently is 40.71 Hectares. Further it is also to mention, that the information regarding non forest land could not be entered in Para B of part 1, as the PARIVESH Portal is not supporting to edit the information entered earlier by the User
-----	---	---

		as the PARIVESH Portal is not supporting to edit the information entered earlier by the User Agency. Same was also informed vide this office letter no. 2250/4C dated 21.11.2022
(ii)	Density is mentioned as 0.2 for 984 trees in 7.32 ha. area which appears less. It is requested to provide clarification in this regard and provide correct information.	According to the assessment of 527 trees capable of being felled, the average density of plantation in the affected protected forest area has been estimated at 0.2. (Working plan copy attached-2)
(iii)	It is requested to provide NPV calculation sheet mentioning Eco class and density.	According to the average density of the proposed area, NPV has been calculated and uploaded on the online portal. (Annex attached-3)
(iv)	It is requested to fill the correct information regarding working plan prescription.	According to the action plan, details related to the route and track have been uploaded in the online portal at the appropriate place. (Copy of Working plan attached-4)
(v)	Details of tree are not found uploaded and para 13 in part II. However, Tree Enumeration list found uploaded in part I but the girth size detail is not matching with the details filled at para 4 in part II. A clarification in this regard is required to be submitted and discrepancy is requested to be removed.	In the proposal, the actual affected trees have been uploaded at the designated place, girth wise. (Information attached-5)

अतः प्रभागीय वनाधिकारी द्वारा प्रस्तुत उत्तर महोदय की सेवा में इस अनुरोध के साथ प्रेषित कि प्रस्ताव की विधिवत स्वीकृति जारी करने के सम्बन्ध में अग्रेत्तर कार्यवाही करने पर विचार करना चाहें।

संलग्न:- उपरोक्तानुसार। प्रतिको मे:

भवदीय,
