

No. / 3727 .
H.P. Forest Department.

Dated Bharmour, the/ 04 /10/2022.

From: -

D.F.O. Bharmour.

To: - C.C.F.(T) Chamba.

Subject: -

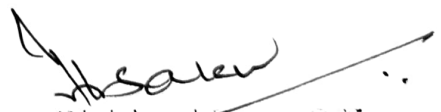

Regarding cumulative study all projects on Ravi River to asses the impact on landscape in general, and wildlife and an ecological aspect in particular.

Memo:-

Kindly refer to your office Memo No. D-V-18/G/ 4600 dated 12/09/2022 on the subject cited above.

The inspection of the area of the project location reveals that although there will be disturbance to the area during construction period but as such no fragmentation of the habitat will be there. There is no specific mention about impact and correction measures regarding wildlife & ecological aspects either in working plan or in CH files. Although a study of Catchment Area Treatment of Ravi River was conducted by C.C.F. Chamba through JP Associates in the year of 2014, but the impact of hydroelectric projects on wildlife and ecology has not been covered in that study.

This is for your kind information please.
