क्र०सं०	आक्षेप	पालना
1	One site located northern most among the 11 selected CA sites, encroachments are seen. How the plantation will be done..	Sites having encroachment have been removed from the area identified for CA plan.
2	It is being seen by google image that 1000 plants may not be planted in the DFL area, so provide additional DFL scheme to fulfill the condition of planting 1000 plants per ha.	Vegetation seems to be dense due to juliflora population spread in the area 1000 plants can be planted still for optimum results total area of DFL has been increased
3	Individual site specific estimates should be provided for all 11 sites.	Actual estimates for individual planting sites according to the site specific conditions have been uploaded
4	No justification given for additional conditions imposed by DCF. Also provide undertaking from user agency to fulfill them.	In a similar diversion case (27.424 hac) NH-148D Gulabpura to unlara road year 2016, previous work done on the particular land was not informed because FCA has no rules as such, but audit para was formed for not disclosing the amounts of previous work done, Thus this time, previous work done in the particular land was disclosed.
