3. The Principle Chief Conservator of Forest (Wildlife), Maharashtra State letter No.Desk-23(2)/WL/Survey/CR. No.198/2109/2022-23, dated 02/11/2022.

Sir,

Government of India, Ministry of Environment, Forest and Climate Change (Forest Conservation Division), New Delhi vide letter under reference No.1 had sought compliance on 13 points. Accordingly, the Chief Conservator of Forests (T.), Kolhapur vide letter under reference No.2 has submitted the compliance of shortcomings on 12 points to this office. Remarks of the Chief Wildlife Warden, Maharashtra State on 1 point related to the Wildlife Wing have been received by this office vide reference No.3. The compliance report on 13 points as desired by the Government of India vide letter dated 12/07/2022 is being submitted as under:-

Sr. No.	Points	Compliance report
i	The Nodal Officer has not provided his own specific recommendation for the proposal in Part -IV of the proposal.	Revised Part-IV including the specific recommendation of the Nodal Officer for the proposal is enclosed herewith as Annexure- 10 .
ii	As per DSS analysis, the calculated forest area for diversion is found to be 80.243 ha. instead of 76.17 ha. as per proposal. Therefore, the correct KML file of 76.17 ha. shall be submitted.	The correct KML file of 76.17 ha. in C.D. is enclosed herewith as Annexure 1A .
iii	The KML file of the forest village 'Kolane' which is proposed to be re-located from the Chandoli National Park shall be submitted/ uploaded.	The KML file of the forest village 'Kolane' which is proposed to be re-located from the Chandoli National Park submitted in C.D. is enclosed herewith as Annexure 1A .
iv	High-resolution satellite imagery shows that the plantations have been carried out in past over the forest land proposed for diversion at village Sonaichiwadi, Malharpeth and village Marulhaveli. This needs	Many forest lands (patches) were scrutinized for resettlement of proposed project affected persons (PAP's) of village Kolane. Most of the forest land patches were unsuitable for agriculture so consent was not accorded by PAP's. But, the said patches of 76.17 ha. is found a suitable patch of which terrain is comparatively leveled, also located near water source and having suitable for agri. So consent has been given by

Another considerable point is that, it is going to save expenses over leveling of land and bringing it under irrigation which is otherwise to be born up by department. Another justification is that at the cost of this territorial plantation we are going to save and develop very rich wildlife area forming an inviolate area as per Hon. Supreme Court Guidelines.</p>	Village	Com No.	Year of Plantation	Area (in Ha.)	Expenditure (inRs.) v	Satellite imagery shows that 80.243 ha area of reserved forest has been identified for diversion at three different sites. Aerial distance between proposed forest diversion site at Village Malharpeth and Village Sonaichiwadi is 2.89 Km and aerial distance between Village Sonaichiwadi and Village Marulhaveli is 1.98 Km. Therefore, the reason for not selecting the forest land for diversion in a single patch needs submission.	<p>Due to non-availability of continuous patch of forest land at a stretch that accommodate all PAP's. Many forest lands (patches) were scrutinized for resettlement by proposed project affected persons (PAP's) of village Kolane. Most of the forest land patches were unsuitable for agriculture so consent was not accorded by PAP's. But the said patches were found a suitable due to following reasons</p> <ol style="list-style-type: none">1. Terrain is comparatively leveled2. Located near water canal3. Having better soil depth.4. xi	The State Govt. shall clarify whether the proposed relocation of villagers will make the total area under the village inviolate or not.	Village "Kolane" proposed for relocation has PAP's as per list prepared by Revenue Department. Hence, out of total 79 PAP's 7 PAP's accorded their consent to relocate as per Option I and remaining 72 PAP's willing to relocate as per option II. Out of total 72 PAP's 48 PAP's accorded their consent to relocate in District Satara and remaining 24 PAP's willing to relocate in District Sangli. This proposal for relocation of 72 PAP's has been submitted. Hence, relocation of all PAP's will make this area devoid of any people and inviolate.

3.0 Sahyadri Tiger Reserve is the first Tiger Reserve of Western Maharashtra and 4th Tiger Reserve of Maharashtra State spreading over two protected areas ie. Koyna WLS and Chandoli NP and its adjoining area of 1165.57 sq.kms area. STR is located in the Sahyadri Ranges of the Western Ghats of Maharashtra. STR is northern most tiger habitat in western ghats protected by declaring it as Tiger Reserve on 5th Jan, 2010.

4.0 It is one of the World Heritage Sites from Western Ghat declared by UNESCO. STR is highly important for conservation due to its unparallel biodiversity & endemism of species of flora & fauna. Hence it is part of one of the Biodiversity Hotspot. Koyna WLS is declared as "Important Bird Area" by Birdlife International. Forest area near Navja village is declared as "Medicinal Plant Conservation Area" by FRLHT, Bangalore. These areas constitute rich evergreen, semi-evergreen and moist deciduous forests.

5.0 The area is spread over 4 districts namely, Satara (Mahabaleshvar, Medha, Satara & Patantahasils), Sangli (Shairala tahasil), Kolhapur (Shahuvadi tahasil) and Ratnagiri (Sangameshvar, Khed tahasils).

6.0 The Northern Western Ghats extends from Dang in Gujarat to Dandeli in Karnataka. This range however is fragmented at many locations owing to human habitation hindering the movement of tigers and other such large mammals. However, these fragments do provide essential cover to

extant species here. Tigers have also been reported previously to range and move around in this stretch, but camera trap records within the limits of Sahyadri Tiger Reserve dates back to 2011 & 2018.

7.0 Govt. of Maharashtra has declared Chandoli Wildlife Sanctuary vide notification No. WLP-1085 CR-588/(I) dated 16th September, 1985 under section 18 of Wildlife (Protection) Act- 1972 for the purpose of protecting, propagating and development of Wildlife therein and its environment. The total area of notified sanctuary is 308.17 sq. kms. Then it is upgraded as Chandoli National Park adding one village Amboli of Kolhapur District and notified total area of 317.67 sq.kms vide Government of Maharashtra notification dated 14 May, 2004. This area is notified as part of Sahyadri Tiger Reserve on 5th January, 2010.

8.0 As provided in the Wildlife Protection Act, 1972 and Maharashtra Land Revenue Code, 1864 the concerning Collectors has already enquired into rights and concessions of the inhabitants and has also ascertained the willingness of the people to relocation. The status of rehabilitation of 33 villages from Chandoli National Park is as follows:

- **Villages relocated by Irrigation Dept.:**

Dist. Sangli : Shiddheswar, Ambole, Bhogiv, Devare, Konoli, Javali (Part), Aloli (Part), Petlond (Part), Takale (Part), Zolambi (Part), Khundlapur (Part), Nandoli (Part), Chandoli Bk. (Part)

Dist. Kolhapur : Durgewadi, Karade, Wadihudumb, Amboli, Sonarli (Part), Tambave (Part).

- **Villages relocated by Forest dept. :**

Dist. Sangli (during 1997 to 1999): Rundiv, Jaoli, Chandoli Kd., Gave, Lotiv, Nivale, Aloli Dhangarwada, Vetti, Petlond Dhangarwada, Takale, Zolambi, Nandoli, Khundlapur, Chandoli Bk.

Dist. Kolhapur (during 1998 to 1999): Chandel, Dhakale, Nivale, Tanali, Sonarli Paiki Dhangarwada, Tambave Paiki Kulyachiwadi.

Dist. Ratnagiri (during 2000 to 2012): Gothane

- **Village under enquiry :** Village Amboli dist. Kolhapur was not included in the Chandoli Wildlife Sanctuary, it is added in Chandoli National Park by notification dt. 14.05.2014. Total population in this village is rehabilitated by Irrigation dept in 1977 due to Warana Irrigation Project; only land above submergence is under enquiry.

- **Villages yet to be relocated by Forest dept:**

9.0 Human in-habitations are mostly been established in fertile lands with assured water supply. Such sites within the forest area are limited and therefore are ecologically significant. Flat grounds along major nalas can support revival floral and faunal attributes and such attributes are completely lost, with the presence of intensive agricultural attributes. Relocation in Chandoli National Park have amply demonstrated the benefits of relocation, especially to wild herbivores and consequently to the whole eco-system. Relocation of village Kolane will make available an area of 128.89.90 ha. of private & 108.29.60 ha. of Revane land and also an area of 248.45.40 ha. of Forest area will be free from human interference.
