<p>Point 10:</p>	<p>As per the KML file, the diversion area is slightly steep and prone to erosion. Therefore, State Govt. may provide details of the mitigation measures to be adopted to arrest the accelerated soil erosion/land slide during/after execution of project. Additionally, the State Govt. may submit Soil & Moisture Conservation Plan along with detail cost of its implementation as per MoEF & CC vide letter No. FC/11/48/2021-FC dated 07.06.2022.</p>	<p>Certified that during the execution period of the proposed road i.e. Construction of link road to Village Dangardi Km 0/00 to 5/675 retaining structures such as retaining walls and breast walls in Concrete as well as in wire crates (gabion walls) will be constructed in the areas where land slide/ soil erosion is likely to occur. Also Longitudinal drains and cross water drains (Hume pipe culverts, slab culverts and solid causeways) will be constructed for proper channelization of rain water which will reduce chances if soil erosion. And after the construction period labour and machinery will be deployed for maintenance of longitudinal drains and well as Cross drainage structures. Certificate in this regard, Undertaking & soil and moisture conservation plan is uploaded in additional information Part-II.</p>
