पत्रांक 3879 / Others/25541/ 2017 ,अलीगढ़: दिनांक: जून: 08 ,2018

सेवामें,

वन संरक्षक,
अलीगढ़ वृत्त, अलीगढ़।

विषय:-

Proposed protected forest land diversion for entry/exit to petrol pump of Essar Oil Limited in SH22A at km 7.4 chainage 73.600 on right shoulder in Khasra no. 141/A in village Lahosara Bisawan of Aligarh District having extent 0.075028 ha. with felling of 10 nos of trees-reg.

संदर्भ:-

भारत सरकार, वन, पर्यावरण एवं जलवायु परिवर्तन मंत्रालय, क्षेत्रीय कार्यालय (मध्य) लखनऊ का पत्रांक 8B/UP/06/19/2018/FC/194 dated 16.03.2018

महोदय,

उपरोक्त विषयक के सम्बन्ध में संदर्भित पत्र द्वारा लगायी गयी आपत्तियों का निराकरण निम्न प्रकार किया जाता है।

S.No.	Observation	REPLY
1	As per GIS DSS analysis of kml file of proposed forest land for diversion:	
	(a) Permanent structures are visible when kml file is overlaid on Google Earth image.	Permanent structures are present in the non forest land which were present are part of a plot basically a room and boundary of the plot has been made. Site had been visited on 23.05.2018 and it was found that there is violation has been made under Forest (Conservation) Act, 1980. Protected forest land proposed for diversion is left untouched.
	(b) There exists a shift also.	Necessary correction has been made in the kml file.
2	The exception certificate issued by the concerned authority under FRA 2006 is silent about rights of pre agricultural forest dwelling communities.	Rights of pre agricultural forest dwelling communities has been properly mentioned in the ammended enclosed FRA 2006 certificate
3	Original layout plan has not been submitted with the proposal.	Original layout plan has been enclosed in the proposal.
4	Area calculation in land schedule submitted is not as per dimensions shown in Xerox copy of layout plan submitted Dimension of width taken for calculation needs to be confirmed. Dimensions provided in PWD NOC should be the basis of calculation.	There was little mistyping error in the Xerox copy of layout plan. Original layout plan and PWD NOC has been enclosed here with. Hence area proposed for diversion is correct according to the enclosed layout plan.
5	(a) As per GIS DSS analysis of proposed Compensatory Afforestation (CA) site is full of vegetation which is not suitable for plantation.	There are small patches present in the forest land proposed for Compensatory Afforestation where plantation will be made. Since there is no norms for better protection of 100 trees and better availability of irrigation for plantation of plants separately. If separate boring is done which is as per Schedule of Rates Aligarh it will cost a huge amount of 26250/- per boring which is also not feasible. It is also not feasible to appoint a separate watcher for protection of just 100 trees. Hence the plantation of 100 trees will be made in lieu of other plantations in small vacant patches.

	(b) Site suitability shall be rechecked and suitability certificate shall be based on DFO's field visit.	Site suitability has been relooked as found to be correct as per above reason.
6	NPV calculation shall be based on correct area.	There is no correction in the proposed forest area. Hence NPV calculation has been left untouched.
7	Site suitability certificate for proposed CA and part V have not been uploaded.	Site suitability certificate for proposed CA and part V have been uploaded in Part II.

संलग्नक- उपरोक्तानुसार।

भवदीय,

(एस0डी0 त्रिपाठी)
