DATE: 7/23/2022

Contents

1. Introduction
2. Necessity of Plantation
3. Specifications of Plantation
4. Summary of tree plantation
5. Annexure-I
 - Kilometer wise calculation of tree plantation is as below-

1. INTRODUCTION:

The Authority has awarded the project "Rehabilitation & Widening work for 2 – Lane with paved shouldering of existing National Highway 80 Alignment from KM 132.895 to Km 190.150 Bhagalpur – Kahalgaon- Mirzachowki section in the state of Bihar" to the EPC Contractor.

2. NECESSITY OF PLANTATION:

For this purpose the total 6563 number of trees are found within proposed toe line of the project highway. Out of that 2891 no. of trees are proposed for Translocation and 3572 no. of trees are proposed for felling.

To counterbalance the loss of trees and other changes resulted into the surroundings; there is a need to follow the approach of "Corridor Development & Management", rather than "Highway Development". Apart from mitigating the environmental losses, it must plan to enhance the aesthetics of the highway corridor from all possible angles. Highways should not be looked upon merely as a means of transportation, but as a part and parcel of the environmental and socio-economic milieu.

3. SPECIFICATIONS FOR PLANTATION:

Specifications for plantation like height of plant, spacing between plants, selection of plants, pit size etc. will be followed according to Table in Cl. 11.14 of IRC: SP: 21 as below-

11.14 Specifications for Avenue Plantations

11.14.1 The technical specifications for planting along the Highways are as follows :

Ornamental Plants (Except Last Row)

Distance from embankment	1.0 m away from the toe of the embankment
Spacing between plant to plant	3 m
Spacing between rows	3 m
Size of the pits	60x60x60 cm (in alkaline soils, kankar panes to be broken by augur. In waterlogged areas, mound with height varying depending on water level)
No. of plants per km	333
Height of the saplings at the time of planting	1.5 m to 2 m
Survival percentage of plantation	90% at any time

Shade Plants (Last Row)

Distance from preceding rows	3.0 m
Spacing between plant to plant	8-12 m (6 m if high mortality expected)
Size of the pits	60x60x60 cm (in alkaline soils, kankar panes to be broken by augur. In waterlogged areas, mound with height varying depending on water level)
No. of plants per km	84 (167 at 6 m spacing)
Height of the saplings at the time of planting	More than 2 m
Survival percentage of plantation	90% after replacement of casualties in first two years. 80% afterwards

Distance of 1st row of Ornamental Plants is considered as 1m from Toe line and spacing between plant to plant is considered as 3m as mentioned in 1st table above.

Distance of 2nd row of Shade Plants is considered as 3m from 1st row (preceding row) and spacing between plant to plant is considered as 8m as mentioned in 2nd table above.

According to Clause 1.4 of Schedule-C protection will be provided of Tree Guard with MS angle Iron and steel wire.

4. Summary :

Total no. of Ornamental tree plantation LHS: 5270 Nos.

Total no. of Ornamental tree plantation RHS: 5270 Nos.

=====

Total no. of Ornamental tree plantation BHS: 10540 Nos.

Total no. of Shade tree plantation LHS: 691 Nos.

Total no. of Shade tree plantation RHS: 691 Nos.

=====

Total no. of Shade tree plantation BHS: 1382 Nos.

5. Annexure-I (Excel file enclosed)

Kilometer wise calculation of tree plantation is as below-

**Abstract of tree Counting in NH-80 From Km 132.895
(Zeromile Bhagalpur) to Km 190.150 (Mirzachouki)**

S.No	Particulars	Trees in LHS	Trees in RHS	Total No of Trees
1	Cutting	2120	1860	3980
2	Translocation	1410	1173	2583
3	Total no of Trees	3530	3033	6563
