The proposed CA land suitable for plantation, site suitability certificate in this regard already uploaded in MOEF portal. CA scheme review and necessary correction has been made accordingly. Copy of CH file is enclosed.
20	Needful has been done in MOEF portal.
21	Bhatova D.P.F has been proposed in Protection working circle in Ah. A.K. Gupta IFS working plan mainly on the basis that it is a scrub forest supporting shrubs. No major timber species were available in the area. And as such could not be allotted to Deodar, Kail WC & Chil WC or Fir -spruce working circle, Also the area is not suitable for raising plantation due to low soil depth and precipitous slopes. It is Clearly written in C.H. file that the area is a shrub area. These include prinsepia, Desmodium etc. Trees are rare and litsia is main constituent along nala and rare Quercus above. Due to grazing pressure / legal limitation it is allotted to the Protection working circle.

This is for favour of information & necessary action at your end please.

Encl. As above
