महाशय,

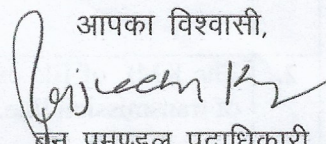

उपर्युक्त विषयक प्रासंगिक पत्र के संबंध में सूचित करना है कि मेसर्स DVC द्वारा CCL Karo Konar 33 KV DC Transmission Line for 16 MVA Power Supply Arrangement परियोजना हेतु कुल-4.9969 हे० वनभूमि अपयोजन के संबंध में भारत सरकार, पर्यावरण, वन एवं जलवायु परिवर्तन मंत्रालय, क्षेत्रीय कार्यालय राँची के पत्रांक-562 दिनांक-17.09.2024 द्वारा कुल-07 बिन्दुओं पर प्रतिवेदन/मंतव्य प्रतिवेदन की मांग की गई है, जिसके आलोक में प्रयोक्ता अभिकरण द्वारा समर्पित निराकरण प्रतिवेदन के आधार पर सूचना निम्नवत् है :-

Sl. No	Point Raised	Compliance
1.	The KML File of the proposed CA site is not uploaded.	Revised KML file of the proposed CA site has been uploaded in Form-A Part-II. It is being submitted in CD. Annex-I
2.	The KML of file examined alternative routes of transmission line.	User Agency has submitted CD containing the KML file of the alternative routes of the transmission line. It is being submitted along with this letter. Annex-II
3.	964 trees were enumerated in the forest land proposed for diversion, but all do not require felling. Details of trees proposed for felling may be uploaded in online application.	User Agency has submitted that total 964 trees required to be felled as per earlier uploaded tree enumeration list.
4.	Detailed component-wise breakup of proposed forest land for diversion is not mentioned in column in part-I (B-2.4) of online application.	User Agency has submitted that component wise break up of proposed forest land is mentioned in Form-A Part-I (B-2.4).

Sl. No	Point Raised	Compliance
5.	As the proposed route is apparently crossing an existing set of railway tracks in forest the NOC from railway, the primary agency to whom the piece of forest land was diverted previously is mandatory. Similarly transmission line is proposed over an apparent chequered area of BTPS (or others) in forest too, therefore NOC is solicited from them also. DFO needs to assert that these are no encroachment on the forest land.	The proposed route is crossing Danea-Jarangdih Railway line. NOC from railway for railway track crossing has been obtained by User Agency which is attached as letter no-939 dt.-28/11/2024. Annex-III User Agency has submitted that the chequered area belongs to M/s CCL not BTPS. User Agency has obtained NOC from M/s CCL. It is submitted that the area is already diverted to M/s CCL for which Stage-II has been granted vide letter no-F.No-8-55/2009-FC Dt.-23/10/2012. Annex-IV Thus on the said portion no encroachment has been found.
6.	As per the Geo-spatial analysis, it appears that the transmission line is passing through the plotted area (near 23°47'18.80" N, 85°53'50.47" E). Hence the DFO may clarify the actual status of the said plotted area.	The said plotted area falls on Plot no.- 2767 which is notified forest land. Forest Diversion has been granted to CCL vide letter no-F.No-8-55/2009-FC Dt.-21/01/2009 & Stage-II has been granted vide letter no-F.No-8-55/2009-FC Dt.-23/10/2012.
7.	The transmission line abruptly originates from the forest land leaving a marginal area unmarked at its northern end. The entire area should be appropriately marked to get included in the proposal.	User Agency has submitted that the transmission line does not originate from the forest land. The transmission line is originating from M/s BTPS switchyard and terminating at proposed Konar CHP substation of M/s CCL. It is submitted that M/s BTPS came in existence prior to commencement of Forest Conservation Act, 1980 and M/s CCL has proposed for diversion for Konar CHP, which is under process. Annex-V

अतः सूचनार्थ एवं आवश्यक कार्रवाई हेतु सादर समर्पित।
