The Additional Chief Secretary Forest Department.

Sub: Proposal for seeking prior approval of the Central Government under Section 2(1)(ii) of the Van (Sanrakshan Evam Samvardhan) Adhiniyam, 1980 for diversion of 338.74 ha of forest land for Coal Mining in Barjora (North) Coal Mine Block in favour of West Bengal Power Development Corporation Limited (WBPDCL), Bankura District, West Bengal (Onlie Proposal No. FP/WB/MIN/43000/2019)-reg.

Ref: MoEF&CC, (FC Division), GoI memo dated 21/10/2024.

Sir,

Apropos to the instant matter, the Barjora (North) Coal Mine proposal is under consideration for grant of Stage-I/In-Principal Approval at MoEF & CC, GOI. The instant proposal was examined by the Advisory Committee and certain additional information was sought. The information is provided as under;

Query	Recommendation of PCCF & HoFF, West Bengal
Point (iv): The PCCF(HoFF) has recommended the proposal, however, keeping in view the fact that the area proposed is in high conservation zone and part of a landscape which is an elephant habitat, an in depth analysis of the issue is needed, especially in view of the concerns raised by the Nodal Officer. The PCCF (HOFF) shall therefore submit his clear recommendations duly addressing the specific concerns raised by the Nodal Officer.	The specific concerns raised by the then Nodal Officer have been addressed in the recommendations made by the PCCF/Wildlife & Chief Wildlife Warden, West Bengal (copy enclosed for ready reference) in this matter earlier and are endorsed by the undersigned. The Barjora North Coal Mine proposal in favour of West Bengal Power Development Corporation Limited (WBPDCL) is therefore recommended in public interest.

Encl/- As stated

(Niraj Singhal) Principal Chief Conservator of Forests & Head of Forest Force, West Bengal.

Office of the Principal Chief Conservator of Forests, Wildlife & Chief Wildlife Warden, West Bengal

Instructions given vide U.O. No. 77(2)-ACS/For/2023 dated 22/09/2023, may please be referred to. The replies to the questions raised in para 3(a)-(i), are based on hard facts. The field units at the levels of DFO and CCF were asked to give their inputs on these questions vide this office memo no. 2757/WL/2W-167/2016 dated 22/09/2023. The reply received from Chief Conservator of Forests, Central Circle are endorsed by the undersigned.

It is mentioned here that the forest land proposed for diversion is not part of recognized elephant corridor. It is also not a passage that is used by elephants for accessing the river Damodar. The entry and exit to the Barjora elephant micro-habitat also lies on the opposite side of the proposed mining land. Thus, the proposed land diversion is not expected to impact established elephant migration route [para 3(d), (e) and (f)].

There was no human death within five (5) kilometre radius from the proposed mining site in Barjora in last 3 years and the compensation paid against crop damage is a modest sum of Rs. 1,40,160/-. The compensation/ ex-gratia amount of Rs 90.96 lakhs mentioned by the Nodal Officer, FCA is the accumulated dues for three years (2020-21, 2021-22 and 2022-23) for the entire Bankura (North) Division. The above account gives correct picture of the human-elephant conflict in the immediate vicinity of the proposed mining site [para 3(b) and (c)].

The proposed site identified for diversion is part of the Barjora elephant habitat, but it lies at the northern-most edge of the habitat abutting the existing mining site. Citing empirical evidence, the DFO and CCF commented that the elephants are occupying the Barjora micro-habitat irrespective of ongoing mining operations. The land proposed for diversion supports a vegetation whose species composition is typical of Bankura (North) Division except for higher abundance of Mohul and Pial, (two elephant fodder species). The forest land falls in Overlapping Wildlife Management Working Circle. [para 3(a), (g) and (h)].

In the recent years, there is a tendency of elephant herds staying longer period of time in Jhargram and Medinipur compared to Bankura (North) [vide para 3(i)].

Considering the above, it is estimated that the impact of the proposed project could be kept at a manageable level using extraction technology that does not require blasting and adopting the safeguards proposed by Divisional Forest Officer, Bankura (N) Division and Chief Conservator of Forest, Central Circle. The Proposal, therefore, is recommended.

Debal Rav

Sir,		· · · · · · · · · · · · · · · · · · ·
	T C	

In reference to the above-mentioned subject, this is informed that after examination of the said proposal by MoEF & CC, Forest Conservation Division, Govt. of India, few essential details were sought to proceed for the forest diversion proposal. Accordingly, EDS has been raised vide letter No. I/85056/2024 dated 21st October,2024.

Point wise compliance /reply is given below for your kind perusal.

Sr. No.	EDS Raised by MoEF&CC	Point Wise Compliance Report
i.	The CWLW while recommending the proposal has mentioned that the impact of the proposed project could be kept at manageable level using extraction technology that does not require blasting. In this regard, the state shall intimate whether the mining is proposed to be done with the extraction technology without blasting or otherwise.	As per reply of user agency and as per Geological Report and Graphic Litholog Data of Boreholes of Barjora (North) Coa Mines, the top most strata (6m-21m approximately is alluvium and may no require blasting operation and can be excavated without blasting whereas in hard strata Blasting is essential for removal of overburden. Controlled deep hole blasting technique will be used with electronic detonator as per DGMS guidelines (Annexure-I), so that there will be no adverse imapcts of blasting on surrounding flora & fauna.

	However, the coal winning will be done through surface minor without blasting method. The Blasting Operation will be done following the recommendations of Scientific Study of CIMFR & Guidelines of DGMS in order to keep the ground vibration & Sound etc. within threshold limit value so that no harms will cause to flora & fauna. Adequate numbers of blast induced ground vibration monitoring instruments & Noise Level Monitoring instruments will be used to monitor the Vibration & Noise for continuous check and balance mechanism to ensure that there is no harm to flora & fauna. Further Control blasting technique will be adopted to eliminate the possibility
	generation of fly rocks as per Scientific Study Report by CIMFR.
	User Agency committed to adhare the norms of air over pressure/noise threshold level 136 dB(L) as per DGMS standard as recommended in scientific study report by CIMFR.
ii. A brief profile of the company/UA should be submitted giving details of their existing mining leases for coal in the State with their capacity of production, the present level of average annual production, location of these pits and the status of reclamation of forest land where mining is completed. Along with this, the State Government should also submit the details of all other coal mining leases with their capacity and average annual production and projected future requirements. They should fully justify the necessity of opening the proposed mining lease on forest land by giving details like total number of mines with mining lease, area, mineable, reserve life of mine, maximum production achieved in particular year against permission granted for production per year".	As replied by User Agency the details are attached in (Annexure – II).
iii. The "Tartora Nala" flows from west to east of the proposed mine boundary and needs to be diverted as per the approved Mining Plan. A justification for the diversion of the Nala needs to be submitted. The state shall examine the matter and give a reasoned justification as to why the diversion of nala is essential and why it is not possible to retain the nala within the mining lease with a safety zone along the nala. The State Govt. shall submit no objection certificate from irrigation/water resource department with regard to the proposed diversion of the said nala.	Query raised by Divisional Forest Officer, Bankura (North) Division vide memo no. 2502/8- dated 25/11/2024 in order to address the EDS raised by MoEF & CC vide letter no. I/85056/2024 dated 21st October,2024. User agency replied point wise compliance on dated 29.11.2024. Wherein Tartora Nala need to be diverted as coal reserve falls beneath the Nala. The diversion of Nala will be after 10 years of minning operation as per approved mining plan & mine closure plan and for that diversion plan submitted by User Agency as annexed (Annexure-III).
as per the approved Mining Plan. A justification for the diversion of the Nala needs to be submitted. The state shall examine the matter and give a reasoned justification as to why the diversion of nala is essential and why it is not possible to retain the nala within the mining lease with a safety zone along the nala. The State Govt. shall submit no objection certificate from irrigation/water resource department with regard	2502/8- dated 25/11/2024 in order t the EDS raised by MoEF & CC v no. I/85056/2024 dated 21st Octo User agency replied point wise co on dated 29.11.2024. Wherein Tarr need to be diverted as coal rese beneath the Nala. The diversion of be after 10 years of minning operati approved mining plan & mine clo and for that diversion plan submittee

Page-2

Page-3

		The user agency undertakes that necessary approval will be obtained by user agency from concerned authority regarding diversion of Tartora nala as per 2 nd Rev. Mine Plan of Barjora (North) Coal Mine (Annexure-IV)
iv.	The PCCF(HoFF) has recommended the proposal, however, keeping in view the fact that the area proposed is in high conservation zone and part of a landscape which is an elephant habitat, an in- depth analysis of the issue is needed, especially in view of the concerns raised by the Nodal Officer. The PCCF(HOFF) shall therefore submit his clear recommendations duly addressing the specific concerns raised by the Nodal Officer.	Out of 2900 ha (approx.) of total forest area, 338.74 ha forest land is proposed for diversion within the Mouzas of Barapukhuria, Ghutgaria, Manohar and Sharjora. Out of total 338.74 ha area of this only 45 ha very dence, 107 ha moderately dence and 57 ha open forest area as per DSS analysis by MoEF & CC.
		In order to mitigate and balance the detrimental impact due to minning activity, State Forest Department has prepared the comprehensive Wildlife Conservation Plan & comprehensive Soil Moisure Conservation Plan with a Financial Outlay of Rs. 90,13,54,162.00 and of Rs. 16,23,65,280.00 respectively.
		Further compensatory afforestation scheme with a financial outlay of Rs. 22,27,54,343.00 has been prepared for implemention. The entire implemention cost will be borne by WBPDCL.
		Furher User Agency has committed to bear any additional plantation as compensatory measure, if directed by State Forest Department, WBPDCL commits to adhere the instruction in totality.
		In post closure of the mine, the used forest land will be reclaimed biologically & technically and will be handed over to State Forest Department as per the prescribed norms.
		WBPDCL, being a State PSU, is dedicated to compensate any impacts due to diversion of the Forest land as per directions/guidelines of Forest Department.
		In view of the above the proposal of Forest Diversion may kindly be considered as it is unavoidable in order to meet the Power requirement of the State of West Bengal.

V.	The compensatory afforestation has been proposed over non-forest land. The regional Office in the SIR has reported that about 169.41 ha area in Jalpaiguri district is in the riverine area of Teesta river. The suitability of the same has to be ensured. Further, it has been informed that during site inspection, only some of the areas proposed for CA in Bankura District were physically inspected. The Regional Office needs to inspect the remaining areas proposed for CA and ensure	Related to Regional Office (RO, MoEF & CC, Bhubaneswar.

Sir,

Please refer to this Directorate's Permission Letter No. No.010985/EZ/Sitarampur Region No.1/Perm/2024/264869 dated 15.07.2024 on the above mentioned subject and subsequent inspection mad by the undersigned on 8th August, 2024.

In exercise of powers conferred on Chief Inspector of Mines (also designated as Director-General of Mines Safety) under Regulation 196 (3) of the Coal Mines Regulations 2017, and by virtue of the authorization granted to me by the Chief Inspector of Mines (also designated as Director-General of Mines Safety) under Section 6(1) of the Mines Act, 1952, I hereby modify the condition Nos. 6, 8, 19k of the permission issued by this Directorate vide letter No.010985/EZ/Sitarampur Region No.1/Perm/2024/264869 dated 15.07.2024. On modification, the modified condition Nos.6, 8, 19k shall be strictly complied with, which are as follows:

(1). Condition No.6 - The explosive weight per delay and total explosive to be detonated in a blasting round shall not be more than the quantities specified below:

blast face	weight to be	Total explosive weight to be detonated in a round	Maximum no. of hole charge	Height of charge column (m)	Stemming height (m)	Hole depth (m)	Drill hole dia (mm)	Initiation System
(m)		Cons	sidering 5 mn	n/s of PPV a	is the safe lim	it of vibr	ation	
100-200	25	1125	45	1.2	4.8	6	153	Electronic detonator
200-400	25	1250	50	1.2	4.8	6	153	Electronic detonator
400-500	25	1250	50	1.2	4.8	6	153	Electronic detonator/NONEL

(2). Condition No.8 – Sufficient number of blast induced ground vibration monitoring instruments to be maintained and monitoring of Peak Particle Velocity (PPV) of blast induced ground vibrations and the dominant frequency shall be done by the management of M/s The West Bengal Power Development Corporation Limited (WBPDCL) for each round of shots fired.

(3). Condition No.19.k. - The blasting within 400 meters distance from structure shall be conducted using Electronic Detonator. Electronic detonator/NONEL system of initiation shall be used beyond 400 meters distance.

All other conditions stipulated in the permission letter issued vide this Directorate's letter No.010985/EZ/Sitarampur Region No.1/Perm/2024/264869 dated 15.07.2024 shall remain unchanged and shal be strictly complied with.

Your Sincerely,

IRFAN AHMED ANSARI (DIRECTOR - SITARAMPUR REGION NO.I) THIS IS A SYSTEM GENERATED DOCUMENT, DOES NOT REQUIRE ANY SIGNATURE.

Director (Mining) Corporate Office, WBPDCL

ABOUT US

WBPDCL..... Powering Bengal

Power Plants:

The goal of WBPDCL is to carry on the business of electric power generation and supply in the state of West Bengal. The thermal power plants under WBPDCL are in Kolaghat, Bakreswar, Sagardighi, Santaldih and Bandel. The Registered & Corporate Office is at Bidyut Unnayan Bhaban, Salt Lake, Kolkata. WBPDCL formed in July, 1985 with only one generating unit at Kolaghat having turnover of Rs. 64 Crore paced up further to Rs. 10974.42 Crore in the financial year 2023-24 with 17 Units. WBPDCL is working in tandem with West Bengal State Electricity Distribution Company Limited (WBSEDCL) and Calcutta Electric Supply Corporation (CESC).

Solar Projects:

The WBPDCL stepped into solar power generation with a 40 KW Rooftop Solar PV Plant at Bidyut Unnayan Bhaban in the year 2014. With the success of this small venture, WBPDCL has entered in solar power generation in a big way by installing rooftop, ground mounted as well as floating Solar PV Plants. In the year 2018, 2 X 3 KW Solar Tree was installed at Bidyut Unnayan Bhaban.

Rooftop Solar PV Plants have been installed on the roofs of 71 buildings of its power plants. Total cumulative capacity of Roof Top Solar PV plant is 10.54 MWp considering all its Thermal Power Plants.

Captive Coal Mines: MoC GoI has allocated 6 coal blocks to WBPDCL. Out of 6 WBPDCL started coal production from 4 coal mines namely Pachwara(N), Barjora(N), Gangaramchak, Borjore and Tara(E & W) since 2018 onward. Reserve of Borjore exhausted Mine closure activity is under progress. Deocha –Pachami-Dewanganj-Harinsingha Coal Block: GR and conceptual report prepared by CMPDIL.

Annexure-III

Chapter-3-Location, Topography & Communication

3.11 Need for Shifting of 220 KV Mejia-Barjora Power Line and Tartola nallah:

An existing 220 KV power line belonging to Damodar Valley Corporation (DVC) passes through the eastern and northern part of the Barjora North Coal Block. The same needs to be diverted to have smooth and safe mining operation in this planned period. WBPDCL has already initiated for this diversion and placed work contract to DVC vide no. HQ/M & C/ 6050000965; dt. 26.2.2019 and subsequently paid the requisite amount of Rs. 8.93 crores for diversion of this 220 KV HT line. The copy of the payment confirmation letter is furnished in **Annexure-XVIIIG.** The approved layout plan for shifting of this HT line is furnished in **Plate No. XX**.

An existing Tartora nallah which flows from west to east, needs to be diverted along the southern edge of the proposed mine boundary. The elevation difference between the entry and exit points of this discharge scheme is about 8 meter. Total length of the diverted nala will be 6.30 km. Based on the present day flow parameters as observed at site, the base width and depth of the nala has been considered as 3 meter and 2.5 meter respectively. A more detail design needs to be done including cutting and filling requirement and vertical drop considerations before diversion of this nala. Chainage wise details of conceptual nala diversion is furnished Plate **No XVIII.** A declaration in this regard from M/S WBPDCL has been furnished in **Annexure-XVIII H.**

RQP: Abhai Pratap Singh RQP. (No. 34011/(50)/2009-CPAM; Dt. 07.10.2009).

Chapter-5-Mining

will be 187.85 ha of mined out areas. The stage plan at the end of 15th Year is furnished in Plate No. XIII D.

15th Year of Mine Operation:

The mine will progress towards more south and almost cover the central part of the block. The total disturbed area at the end of this stage will be around 335.83 ha. Floor of Seam-I will be continued to maintain as guarry floor and the deepest part of the guarry will be at (-) 10 m RL. Both the backfilled dumping areas will be merged together to form a single dumping ground. Total backfilled dump area will be around 109.30 ha. Central Haul road will be pushed towards southward direction and it will terminate near the Infrastructure area at the coal stock yard. Diversion of TartoraNala is expected to be completed between 10th to 15th Year. At the end of 15th Year stage, TartoraNala will be shifted completely. Almost all the seams partially will be intersected in this period. Top soil spreading will commence in the northern patch of the merged dump. A water sump covering an area of 5.14 ha will be formed in between the two dumps.

The stage plan at the end of 15th Year is furnished in Plate No. XIII E.

20th Year of Mine Operation:

The mining operation at this level will reach to its southernmost extension. The southern limit will be defined by the safety barrier of the diverted nala at a distance of 15 meter from the bank. Central haul road will be extended till the southernmost tip of the mine. The establishment section in the southern part of the proposed lease boundary needs to be vacated by this period. Depth of mining will follow the floor of Seam-I and will be limited to (-) 15 m RL. Besides the merged dump in the previous stage, two more dumps of 62.45 ha and 50.45 ha respectively will be created in either side of the central haul road. Height of both the dumps will remain below the base level, however will not raise above the average ground level. Water sump will remain intact at this level and will be utilized as mine water arrestor.

The stage plan at the end of 20th Year is furnished in Plate No. XIII F.
