Sir,

Government of India, Ministry of Environment, Forest and Climate Change (Forest Conservation Division), New Delhi vide letter under reference No.1 had sought compliance on 11 points. Accordingly, the Chief Conservator of Forests (T.), Kolhapur vide letter under reference No.2 has submitted the compliance of shortcoming in this regard to this office. The compliance report as desired by the Government of India vide letter dated 30/06/2022 is submitted as under:-

Sr. No.	Points	Compliance report
i	The Nodal Office has not provided his own specific recommendation for the proposal in Part- IV of the proposal.	Revised Part-IV including the specific recommendation of the Nodal Officer for the proposal is enclosed herewith as <b>Annexure-9</b> .
ii	As per DSS analysis, the calculated forest area for diversion is found to be 239.301 ha. instead of 227.90 ha as per proposal. Therefore the correct KML file of 227.90 ha. shall be submitted.	The correct KML file of 227.90 ha. in C.D. is enclosed herewith as <b>Annexure 1A</b> .
iii	The KML file of the forest village 'Male' which is proposed to be re-located from the Chandoli National Park has not been submitted, which is required to be done.	The KML file of the forest village 'Male' which is proposed to be re-located from the Chandoli National Park submitted in C.D. is enclosed herewith as <b>Annexure 1A</b> .
iv	High-resolution satellite imagery shows that the plantations have been carried out within the forest land proposed for diversion at village Gosavewadi,	Many forest lands (patches) were scrutinized for resettlement of proposed project affected persons (PAP's) of village Male. Most of the forest land patches were unsuitable for agriculture so consent was not accorded by PAP's. But the said patches of 227.90 ha. is found a suitable patch of which terrain is comparatively leveled, also located near water source and

	Hanbarwadi, Kharade and village Bahule. This needs clarification.	<p>having better soil depth. So consent has been given by PAP's. Land being suitable for plantation so plantation activities carried out on the said patch as per description given below.</p> <table border="1" data-bbox="678 219 1453 568"> <thead> <tr> <th>Village</th> <th>Com No.</th> <th>Year of Plantation</th> <th>Area (in Ha.)</th> <th>Expenditure (inRs.)</th> </tr> </thead> <tbody> <tr> <td>Bahule</td> <td>509, 510</td> <td>2014-15</td> <td>50</td> <td>2863620/-</td> </tr> <tr> <td>Kharade</td> <td>653</td> <td>2003-04</td> <td>9.15</td> <td>193000/-</td> </tr> <tr> <td rowspan="2">Helgaon</td> <td rowspan="2">653</td> <td>2014-15</td> <td>15</td> <td>1162198/-</td> </tr> <tr> <td>2019-20</td> <td>15</td> <td>72425/-</td> </tr> <tr> <td rowspan="2">Hanabarwadi</td> <td rowspan="2">653</td> <td>2015-16</td> <td>29</td> <td>2000000/-</td> </tr> <tr> <td>2016-17</td> <td>20</td> <td>2266000/-</td> </tr> <tr> <td>Gosaviwadi</td> <td>653</td> <td>2016-17</td> <td>20</td> <td>2400000/-</td> </tr> <tr> <td colspan="3" style="text-align: center;">Total</td> <td></td> <td>10957243/-</td> </tr> </tbody> </table> <p>Though most of above expenses over plantation are going to be unfruitful but lack of alternate suitable land with potential irrigation facilities compel us to divert this land which is under plantation. Another considerable point is that, it is going to save expenses over leveling of land and bringing it under irrigation which is otherwise to be born up by department. Another justification is that at the cost of this territorial plantation we are going to save and develop very rich wildlife area forming an inviolate area as per Hon. Supreme Court Guidelines.</p>	Village	Com No.	Year of Plantation	Area (in Ha.)	Expenditure (inRs.) v	Satellite imaginary shows that the forest land proposed for forest diversion at village Hanbarwadi, Helgaon, and village Kharade is neither continuous nor on plain surface. Identification of such fragmented patches for diversion on the on the undulating surface which may be susceptible to erosion can further lead to degradation of nearby forest areas owing to human incumbencies and activities. This need clarification.	<p>Many forest lands (patches) were scrutinized for resettlement by proposed project affected persons (PAP's) of village Male. Most of the forest land patches were unsuitable for agriculture so consent was not accorded by PAP's. But the said patches were found a suitable due to following reasons:-</p> <ol style="list-style-type: none"> <li>1. Terrain is comparatively leveled</li> <li>2. Located near water canal</li> <li>3. Having better soil depth.</li> <li>4. Having better road connectivity</li> <li>5. Better employment chances due to vicinity of Karad City.</li> </ol> <p>So consent has been given by PAP's. Appropriate soil and moisture conservation (SMC) measures can be taken on remaining forest land near the diverted area in order to minimize possible degradation.</p>

**7.0** Human in-habitations are mostly been established in fertile lands with assured water supply. Such sites within the forest area are limited and therefore are ecologically significant. Flat grounds along major nalas can support revival floral and faunal attributes and such attributes are completely

lost, with the presence of intensive agricultural attributes. Relocation in Chandoli National Park have amply demonstrated the benefits of relocation, especially to wild herbivores and consequently to the whole eco-system. Relocation of village Male will make available an area of 261.88 ha. of private agriculture land along as compensatory land for this project. Also an area of 257.61 ha. of revenue waste land and 1141.15 ha. of forest land will be free from human interference.

**8.0** Out of 140 projects affected persons/ Khatedars of Male Village, 20 Khatedars accorded consent to Option-I with 10 lakh package. Remaining 120 Khatedars accorded consent to Option-II of land to land and Gaonthan rehabilitation. Out of this one group of 58 Khatedars selected forest land at Bahule, Tahsil Patan and another group of 62 Khatedars selected forest land at Kharade, Helgaon, Hanbarwadi and Gosavewadi, Tahsil Karad for rehabilitation. Reasons to relocate one village at two different places includes unavailability of continuous patch of land at a stretch that can accommodate all 120 project affected persons / Khatedars who opted Option-II and also willingness and personal choices of two groups in selection of sites. Thus establishment of two gaonthans at Bahule and Kharade - Helgaon became unavoidable.

**Details of land requirement are as follows :-**

Sr. No.	Location	No. of Khatedars	Land for agriculture	Gaonthan Area	Unsuitable land in-between	Total Area Required
1.	Bahule	58	95.90 ha.	6.00 ha.	11.00 ha.	112.90 ha.

5	Gosavewadi	95	16.00

**9.0** Hence, the proposal for diversion of 112.90 ha. reserve forest land from Bahule forest gat no. 346 and 9.15 ha. reserve forest land from Kharade forest gat no. 314, 32.85 ha. reserve forest land from Helgaon forest gat no.1187b, 49.00 ha reserve forest land from Hanbarwadi forest gat no. 130 and 24.00 ha reserve forest land from Gosavewadi forest gat no. 95, 117 is submitted.

**10.0** As per para 1.15 of Handbook issued vide Government of India's letter dated 28/03/2019, the Deputy Conservator of Forests, Satara Forest Division, Satara has submitted complete justification for locating the project in the forest area to prove the project is site-specific as under:-

‘Land is not available in any command area of Irrigation Projects in Satara districts. There is no sufficient land available from “Gairan” or “Revenue waste land” in possession of Revenue department. Even in forests, it is not available in a continuous patch of land at a stretch that can
