No. 72/ci/west/2019/477

Dated 29-6-22

ROUTE ALIGNMENT

The route alignment for stringing of 11 kV electrical sub-transmission line has been finalised after thorough verification of site condition for electrification of the Border Out-Posts (BOPs) for 72nd BN, Shastra Seema Bal (SSB) located at Sakhimdara, Dhoban and Nayapatal. The route alignment as proposed at present has been found out to be the best from electrical point of view for supervision, maintenance and other electrical allied works, shortest and passes through less forest vegetation areas as compared to the initial alignment proposed to be adopted. This route alignment has been finalised after third and final route survey conducted this time jointly by the user agency, SSB officials, land revenue personal and the Forest Department officials. The route has been adopted as it passes through the public habitation village Chowri and causing less damage to the forest property. The work has been marked as topmost priority in the Power Department (user agency) considering its strategic importance, as it pertains to providing a basic amenity electric power supply to our soldiers guarding our International Boarder at very difficult terrain and high altitude.
