Name of Work: Diversion of 17.25 ha. forest land in favor of MSETCL Pune for construction of proposed 400 kV D/C line from 400 kV Jejuri S/S to proposed 400 kV Hinjewadi S/S in Pune District

Undertaking for compliance point no. 1

Compliance point no. 1:

"The State Government shall provide the status quo of Private Forest land under litigation which under consideration with Hon'ble Supreme Court Further, a brief summary of the land issue raised in the Civil Appeal no. 5454/219 and the prayer made by the petitioner before the Hon'ble Supreme Court need to be submitted by the State Government. The Stage - I approval shall not be issued until the matter is sub-judice or as per any instruction passed by the Hon'ble Supreme Court."

In view of above-mentioned compliance point, it is important to bring into your kind notice that importance and benefits of the said project:

Importance/ Benefits of work:

There is huge demand from upcoming EHV consumer, Data Centers in Hinjewadi Infotech Park & it will also give relief to existing critically loaded lines & substations in 220kV grid like Chinchwad, Parvati, Urse etc. which in turn will give relief to 400kV Jejuri S/S, 400kV Lonikand S/S & 400kV Chakan S/S. And also it is very necessary as to make the 400kV Grid more reliable and stable. Also it is required to cater the increasing day by day demand of Pune district.

400kV GIS Hinjewadi substation is ready & back charged (on 30.05.2016) through 220kV D/C UG cable interconnection from 400kV Hinjewadi to 220kV Hinjewadi-II S/S. However, the load cannot be taken as the work of 400kV Jejuri-Hinjewadi D/C incoming line is not completed. Hence kept off & entire substation cannot be commissioned unless 400kV line work is completed.

As well as the timely completion of this project will give relief to MSETCL's existing critically loaded lines & substations in 220 kV grid and which in turns will gives relief to 400 kV grid and also it is very necessary to make the 400-kV grid more

Sub: Diversion of 17.25 ha. forest land in favor of MSETCL Pune for construction of proposed 400 kV D/C line from 400 kV Jejuri S/S to proposed 400 kV Hinjewadi S/S in Pune District.

---Undertaking for compliance point no. 1.

reliable and stable to give uninterrupted supply to Pune District, which will enhance our district power infrastructure.

As the said matter is under consideration with the Hon'ble Supreme Court, it may require minimum 1 – 2 year to sub-judice the matter. And this time period is very huge considering the significance and urgency of this project. Not only the is the project strategic importance, serving a very vast array of EHV consumer and enhancing our district power infrastructure, but also any delay due to legal compliances could lead to substantial setback to the power infrastructure development of Pune district.

Considering the above said importance and benefits of project, it is kindly requested to please review the compliance point no. 1. and also requested to process the stage -I approval with condition may be.

It is to state that this office is abide to the orders passed by the Hon'ble Supreme Court in this matter. And also, the compensation applicable will be paid to the concerned i.e. the land owners or the private forest (state government) as per the applicable GR.

Accordingly, 400 kV EHV Transmission line was proposed from existing 400 kV Jejuri S/S to proposed 400 kV Hinjewadi S/S. Total Route Length of line is 93 km. Also Proposed line is passing through Taluka – Haveli, Bhore, Purandar, Mulshi and Maval of Dist – Pune.

Further, proposed transmission line route is crossing forest area at four different villages, viz village – Shivare (2 towers), village – Dapode (Only belt), village – Ghotawade (1 tower) and village – Man (8 towers).

Accordingly, total 11 towers needed to be constructed in forest area. Therefore, muck disposal plan for construction activity of total 11 towers in forest area is discussed as below.

I) Muck disposal plan/strategy at Shivare forest area

A) Detail of site: -

- i) Number of towers needed to be constructed – 2 Nos.
- ii) Maximum volume of excavation – length is 4 meter, width is 4 meter & depth is 3.5 meter, (Pit size-4m X 4m X 3.5m)
- iii) Number of excavation Pit for one Tower – 4 Nos.
- iv) Distance between two towers – 447 meter which are located in forest area.
- v) Terrain in surrounding –Hilly terrain, scattered tree and rare vegetation.
- vi) No any River and water bodies nearby construction site.
- vii) Approximate quantity of excavated material for one tower – 233.64 Cubic meters.
- viii) Tentative Muck generated for one tower – 10% of total excavated material i.e. 23.36 cubic meters.

B) Dumping process adopted: -

As the Muck generated in proposed constructed site is very less and negligible for individual towers in comparison with volume of excavated material, generated Muck will be disposed of in surrounding of constructed site. Also, generated Muck will be carried in Tractor or small size

Dumper Trucks to avoid any additional damage to surrounding forest area. Also, it is be noted that, said construction site has minimum vegetation and tree density therefore, adequate space for muck disposal is available.

II) Muck disposal plan/strategy at Dapode forest area.

As no any tower will be constructed in forest area, Muck disposal plan not needed for this location.

III) Muck disposal plan/strategy for Ghotawade forest area.

A) Detail of site: –

- i) Number of towers needed to be constructed – 1 Nos.
- ii) Maximum volume of excavation – length is 4 meter, width is 4 meter & depth is 3.5 meter. (Pit size-4x4x3.5 cubic meter).
- iii) Number of Pit for individual Tower – 4 Nos.
- iv) Number of Pit-4 Nos.
- v) Terrain in surrounding –Hilly terrain, dense plantation.
- vi) No any River and water bodies nearby construction site.
- vii) Approximate quantity of excavated material for one tower – 233.64 Cubic meters.
- viii) Tentative Muck generated for one tower – 10% of total excavated material i.e. 23.36 cubic meters.

B) Dumping process adopted: –

As the Muck generated in proposed constructed site is very less and negligible for individual towers in compare to volume of excavated material, generated Muck will be disposed of in surrounding of constructed site. Also, generated Muck will be carried in Tractor or small size Dumper Trucks to avoid any additional damage to surrounding forest area. Also, it is be noted that said construction site has dense plantation cover so, dumping will be done where minimum possible forest area cover is available by consulting with Forest Authority. Muck generated will be carried in dumper trucks or Tractor covered with heavy duty tarpaulin properly tied to the vehicle.

IV) Muck disposal plan/strategy at Maan forest area

A) Detail of site: -

- i) Number of towers needed to be constructed – 8 Nos.
- ii) Maximum volume of excavation – lenght is 4 meter, width is 4 meter & depth is 3.5 meter. (Pit size-4x4x3.5 cubic meter).

- iii) Number of Pit for individual Tower – 4 Nos.
- iv) Number of Pit – 4 Nos.
- v) Terrain in surrounding –Hilly terrain, dense plantation.
- vi) No any River and water bodies nearby construction site.
- vii) Approximate quantity of excavated material for one tower – 233.64 Cubic meters.
- Viii) Tentative Muck generated for one tower – 10% of total excavated material i.e. 23.36 Cubic Meters.

B) Dumping process adopted: –

As the Muck generated in proposed constructed site is very less and negligible for individual towers in compare to volume of excavated material, generated Muck will be disposed of in surrounding of constructed site. Also, generated Muck will be carried in Tractor or small size Dumper Trucks to avoid any additional damage to surrounding forest area. Also, it is be noted that said construction site has dense plantation cover so, dumping will be done where minimum possible forest area cover is available by consulting with Forest Authority. Muck generated will be carried in dumper trucks or Tractor covered with heavy duty tarpaulin properly tied to the vehicle.
