क्र०सं०	प्रश्न	उत्तर
1	FRA certificate is undated and District Level Committee meeting proceedings not provided.	Dated FRA certificate and DLC minutes attached with FRA certificate at section K (i) in form A part I by user agency.
2	No. Of trees is 738 in part I but 391 in part II.	DFO has mentioned that out of 738 trees, 280 trees are of less than 30-60 girth class. Remaining 458 trees have been entered in Part II.
3	Column 5.4 and 5.5 of Site Inspection Report of DFO left blank	SIR with filled columns 5.4 and 5.5 is uploaded online at column no -15 in form A part II by DFO.
4	Information at point 12 of Part II not correct	DFO has mentioned that the Point no. 12 is disabled as point no. 11 says NO.
5	In all 738 trees including 334 oak trees are proposed to be felled over an area of 0.84 ha which works at 830 trees per ha. In view of large no. Of trees involved it may not be possible to approve the proposal in present form .It is noticed from the digital map that from Ghughukhan to Mehrora the road alignment passes through very dense forest while bare land of village Mehrora is visible nearby and the road can be proposed from this land instead of dense forest.	DFO has mentioned that out of 738, 520 trees are proposed to be translocated and planted and only remaining 218 trees will be felled.
6	Recommendation of DFO not attached.	Recommendation of DFO uploaded in Form A part II by DFO.

भवदीय,
